THE NATIONAL MUSIC COURSE

THE NEW

SECOND MUSIC READER

BASED LARGELY UPON C. H. DOHMANN

GIVING FIRST LESSONS IN

READING MUSIC AT SIGHT

WITH ONE AND TWO-PART EXERCISES AND SONGS, AND DIRECTIONS TO TEACHERS

BY

LUTHER WHITING MASON

THE prevalent desire for novelies has led many friends of this Method to
deprecate the retention, in these revisions, of so many of the selections used in
the first editions of the National Music Course; but while the author
appreciates the full force of the popular taste, he also realizes the innate educa-
tional value of this material, which has become all the greater for its proven
fitness. So much is this the fact, that after diligent search throughout Europe,
especially in those centres where school music receives the fostering care of the
state and the service of the best intellects, he has found it impossible to
replace these selections, except in a few instances, inasmuch as they are im-
portant members of a carefully considered and well organized system, the
rejection of which would materially injure the completeness of the whole.

There will be found, however, in the elaboration of the elementary portion
of this book, much that is new and helpful to both teacher and pupil, the use of
which has been made practicable by the general advancement of the science of
teaching music in the schools — amongst which may be mentioned, Rhythmic
Analyses (by means of Time-Names, as originally invented by the Author of
this work); Preparatory Exercises in the Study of Two-Part Singing; German
Chromatic Pitch-Names, adapted to American usage; Special Exercises in Sing-
ing Chromatic Sounds; Diagrams of the Scale in the Various Keys; and Going
from One Key to Another, — together with suggestions to the teacher, at such
points as seem to require particular treatment.

In the Introduction will be found interesting chapters on Time and Time;
Illustrative Preparatory Lessons for the use of such schools as commence this
course with the New Second Series of Charts and this Reader.

Part IV contains Test-Exercises for individual reading, — which is seldom
provided for, but which is as necessary in the study of music as in that of
language,— to inspire the pupil with self-reliance.

In the Appendix is a full explanation of the system and use of Time-Names,
the object of which is to designate the position of each note in a measure of
whatever kind of time. This system does not pretend to teach or develop time,
but simply to name the notes in any given measure. It differs entirely from
the Chevé system of Time-Names (which has been adopted in the Tonic-Sol-Fa
method in a modified form), as, in this system, the measure is the unit, while in
the Chevé system the unit is a "pulse" or beat.
The New Second Series of National Music Charts are intended to accompany this Reader, and have received similar treatment in their preparation; and both should be used in connection, to secure the best results.

Finally, we will, in this as in former editions, call the teacher's attention to the following general directions:—

1. Require a good position of the pupils while singing.
2. Do not allow them to sing too loud, or to shout instead of singing.
3. Do not let them heavily drag the rhythm.
4. Do not permit coarseness of utterance or indistinct articulation.
5. From the very first, aim at imparting a generally soft style of singing as the basis of all expression.
6. Encourage liveliness and cordiality of manner, to preserve the buoyancy of the music.

Acknowledgments are due to Mrs. Adelia L. Loughlin, of Hyde Park, Mass., for translations (designated by a +); and to Mr. G. A. Veazie, Jr., of Chelsea, Mass., and others, for valuable assistance.

INTRODUCTION

TO THE

NEW SECOND NATIONAL MUSIC READER
"Mullum in Parvo."
INTRODUCTION.

I.—TUNE.

The object of this Introduction is to aid such teachers of common schools as know but little about music to teach a class of children from eight to eleven or twelve years of age to sing through the following course. It is very natural to suppose that, as this is the Second Reader, corresponding with the Second Series of Charts, it is necessary to have gone through the First. But it is not so. The First Reader and Charts are designed for children from five to eight years of age, and are not adapted to interest children beyond that age.

We have therefore prepared this Introduction to the Second, to be used instead of the First, Series of Music Charts and First Music Reader, for children the majority of whom are over eight years of age.

We would suggest as a course in rote-singing,—

(1.) The following songs from the Second Reader (only the melody of each):

- "Praise of Singing," " 54.

(2.) THE SCALE.—The teacher having written the diagram shown on page xviii of this book upon the blackboard, the scale is to be learned by rote as a tune, and is not to be explained nor talked about at present. It should be sung both by the numerals, or scale-names, and by the syllables, ascending and descending.

In every school where there has been no regular instruction in singing, the teacher may expect to find three classes:

1. The positively musical.
2. The passively musical.
3. The negatively musical.
INTRODUCTION.

The positively musical are those who have been accustomed to sing at home, in school, or in Sunday-school, so that they can sing several songs by rote, and are glad of the opportunity to learn more in this way.

The passive class are those who have sufficient musical talent, but it has never been called into exercise.

The negative, are those who have a talent for music, but have been led to believe they had not, by hearing it said that "there was no music in the families" to which they belong; and their parents and friends oppose music in schools, saying it is a waste of time and money, and an injustice to those who cannot learn to sing, etc.

The proportion of the positive class to the other two will depend upon the influences, musical, that have been brought to bear upon them up to the ages of eight or nine years. If the children have been accustomed to hear singing at home, at school, and in Sunday-school, and have not been discouraged by their parents and friends in their first attempts, there will be but very few of the negative class.

In commencing, let the teacher direct her attention to the positive class. Do not urge those who have not been accustomed to singing to join in the exercises at first. If any in their first attempts sing out of tune, the teacher should ask them to listen; but do not discourage them. Give them to understand that this is one way to learn to sing,—that is, to listen.

By way of encouragement, let the teacher establish some test of improvement. Our test is the scale. Let the teacher find out: How many can sing the scale alone; How many can sing up and down three sounds of the scale correctly; How many five or six sounds; and encourage those who are disposed to try, by telling them that if they can learn to sing the scale up and down correctly, they can learn to read music.

"Veazie's Music Primer," which is published by Messrs. Ginn & Co., will be found valuable at this stage of work, as it contains a carefully prepared set of progressive scale-exercises in figures, easy of comprehension, and admirably calculated to lead the pupil on toward the study of staff notation. Full directions are given in the work for the teacher's guidance; and as it quite inexpensive, there is no reason why any teacher should be without its aid.
II.—TIME.

Have you ever observed children following a band of Music,—how with lengthened strides they will endeavor to keep step to the measured strains of the march? or the boy with his clappers, giving out in smart, clear clicks the well-defined rhythm of some popular song,—this without any knowledge of music as a science, and only exhibiting a latent sense of that rhythm which is in and through all Nature?

If a boy marches well, keeping step to the music, or plays his clappers with more or less rhythmical accuracy, we say that the child keeps "good time," or is a good timist.

Now this sense of Time, like that of Tune, is not equally possessed by all children at first. To some it is just as natural to sing or play in time as it is to breathe; to others it is a matter of development; and to say that a child who does not at once show the ability is therefore incapable of attaining its possession, is unjust.

We give our school-children a fair trial in regard to tune, and with abundant success; let us be as fair in the matter of time.

We require precision in pitch when singing the sounds of the scale. We must be just as particular to require precision in time, in order to insure success in reading music at sight.

Precision of movement shall be the text of this chapter; and this should be the teacher's aim in her efforts to awaken "Time, in her classes,—trusting to the influence of the models of song presented in the course of study to round off all the sharp angles and finally produce a liberty of movement which shall never degenerate into license, but which shall always be pure, free, and graceful, and under the firm control of an educated will.

Although there is a wide difference of opinion among our native singing-teachers relative to the matter of teaching time, it is nevertheless true, that the surest and best results have followed in the train of those teachers of the past and present age who have faithfully and persistently held to the so-called "old fashioned" mode of beating time with the hand.*

* Dr. John Hullah, Inspector of Music, in his Report on the Examination in Music of the Students of Training Schools in Great Britain for the year 1872, says: "If I were to point out any single shortcoming which in the course of these examinations has struck me more frequently
INTRODUCTION.

Wherever this method has been been loyally tried, it has worked successfully; and where it has proved unsuccessful, its failure may be fairly attributed to want of care and lack of persistent effort in its teaching. Beating time is in itself alone an art which requires as careful a training to master as do any of the beautiful calisthenic exercises which are the grace and pride of many a school-room; and it should for a time be classed as a special study, and a few minutes daily devoted to careful drill in its positions and movements.

The following directions may serve to assist the teacher in commencing the study of "Beating Time" as an Art. It must be remembered, however, that from the very first attempts the class must be carefully scrutinized, all laggards spurred up to work briskly, and kind encouragement given to those who are willing, but awkward, in their trials. After one series of classes have acquired the art, it will be very easy to keep it up.

THE ART OF BEATING TIME WITH THE Hand.

It is supposed that the sense of time has been developed to some degree, unconsciously, by means of rote-singing. The pupils are now to acquire the art of reading music from the notes; and this includes the ability to give each note in a measure its right length, as well as the right pitch, and that without any aid from the teacher.

The experience of centuries teaches that the best way to do this in singing is by some method of beating time with the hand. History also shows that all substitutes for this—such as metronomes, improvised pendulums, pinching one's self,* etc.—are failures so far as they tend to develop the ability to read music independently as to time.

POSITION FOR BEATING TIME.

Sit or stand erect, poising forward a little, with active chest. Place the elbows at the side, just far enough back to allow the middle finger of the right hand to touch the centre of the palm of the left.

*There is a method now before the public which recommends the pupils' pinching themselves, that they may "feel the time all through them." Such is the strainings for "new departures"! To suppose that a thing must always be new to be good, is about as shallow as to take everything to be good because it is new. Let us hold fast to the good that we have till we have proved something else to be better.
INTRODUCTION.

The Downward and the Upward motions should be from the wrist only. This is very important, as it will not tire the pupils so soon, and they will be less liable to jerk the body while beating. Some children will require special instruction and drill in this, as they will not be able at first to make much motion from the wrist. A good plan, perhaps, is to direct the pupils to seize the right wrist with the left hand in a firm grip, and then to move the right hand up and down, like a pigeon's wing in flying. The teacher can do this while the pupils imitate her, and most of them will get a clear idea of the motion from the wrist.

The teacher may now proceed somewhat as follows: —

LESSON I.

BEATING TWO-PART MEASURE.—POSITION.

Teacher. Attention!

[The pupils give their attention.]

T. Place your hands as I do mine!

[a. The teacher places her hands so that the end of the middle finger of the right hand shall rest in the centre of the palm of the left, and draws the elbows well back, bringing the forearms into a horizontal position, quite close to the body. The pupils imitate her with more or less success at first, but finally all do it very well; for it is not very difficult.]

T. You are doing very well indeed. Now watch me, and do as I do!

[b. The teacher raises her hand from its horizontal position to a nearly upright one, by a quick motion from the wrist only, and keeps her hand in that position. The pupils imitate her.]

T. [With her hand still in upright position.] When I say, Position for beating time, I wish you to place your hands as you have them now. Watch me again, and do as I do. Attention!

[Teacher drops her hands at her sides. The class imitates her.]

T. Very well. Position for beating time!

[Many of the pupils understand, and take the position promptly; some move indolently, others place the left hand above the right, and so on.]
INTRODUCTION.

T. Some of you did quite well. But I want you all to do it well; and to do that, you must be smart, quick, about it. When I say, Attention, drop your hands at your sides. Attention!

[Teacher drops hands at her sides. The pupils imitate her.]

T. Position for beating time!

[Teacher again takes position, as at b, and the pupils imitate her more successfully, as a class, than at first. As this is the first step, it will be better to be quite sure of it before proceeding farther; and it may need several trials to enable all to take the position promptly.]

LESSON II.

TWO-PART MEASURE CONTINUED.—BEATING.

Teacher. Attention!

[Teacher and pupils drop their hands at their sides.]

T. Watch me, now, and notice what I do.

[Teacher places her hands in position for beating time; then, bringing the right hand down into the position described at a, asks,—]

T. Which way did my hand go then?

Pupils. It went down.

T. Yes; and we will call it the Downward Beat, and this [raising the right hand to position b] the Upward Beat; and the two beats we will call a measure. Now watch me, and tell me how many measures I beat:

*Downward beat, upward beat Downward beat, upward beat.

P. Two measures.

T. Very good. Now you may try. Position for beating time!

[Pupils take position.]

T. Beat two measures.

* In these lessons the teacher will say nothing about accent; but will be careful to give an emphasis to the syllable or word Down, in naming the down beat, in all measures, and a slight stress to the word Right, in naming the beat in four-part measure, and be careful that the class imitate her in this respect. This is better than talking too much about accent at first.
INTRODUCTION.

[The teacher and class beat two measures, naming the beats, and then four; and continue until a fair degree of uniformity and precision of movement is established.]

In nearly all classes there will be found some pupils who are inclined to keep the hand in constant aimless motion. Such require particular attention, and should be led to observe that after each beat the hand remains perfectly quiet; also, that the motions should be quick and decisive, but without noise from the hands.

At this stage, if desirable, the lessons in singing from figures can be taken up, and carried as far as Exercise 25.

——

LESSON III.

BEATING THREE-PART MEASURE.

T. Attention! You will notice again what I do.

[Teacher places her hands in position for beating time, and gives the down-beat, saying Down; then moves the right hand smartly to the left, so that the base of the thumb shall touch the body, saying Left; and from that upward to the first position, saying Up;—these three movements being done with steadiness, and with a studied angularity, that each motion may be perfectly clear to the pupils.]

T. How many beats did I make then?

P. Three.

T. What did I call them?

P. Down, Left, Up.

T. Good! That is called Beating three-part measure. Watch me, and tell me how many three-part measures I beat: [beating] Down, Left, Up; Down, Left, Up; Down, Left, Up; Down, Left, Up.

P. Four measures.

T. Very well. You may try: Position for beating time! Beat two measures of three-part time, naming the beats.

[Pupils try, but find it more difficult than beating two-part measure. The teacher patiently encourages, until a fair degree of proficiency is attained; when Exercises in Figures from No. 26 to No. 36 may be taught.]
INTRODUCTION.

LESSON IV.

BEATING FOUR-PART MEASURE.

T. Attention! Watch me again, and notice what I do.

[Teacher places her hands in position, and gives the down- and left-beats, naming them; then says Right, moving the right hand from the body, the fingers sweeping over the palm and resting upon the fingers of the left hand*; then from that to the first position, saying Up.]

T. How many beats did I make?
P. Four.
T. What did I call them?
P. Down, Left, Right, Up.
T. Yes. That is called four-part measure. Look again, and tell me how many four-part measures I beat: [beating] Down, Left, Right, Up; Down, Left, Right, Up.
P. Two measures.

[There will be found little difficulty with this kind of measure if two-part and three-part have been thoroughly taught. The Exercises in Figures may now be concluded.

---

*In the beating of four-part measure, the attention of the teacher is called particularly to the position of the right hand after the performance of the right-beat—its fingers resting upon those of the left (and not on the palm, as after the down-beat). It is essential that this position be carefully explained to the scholars, as it will be of great value to them hereafter in the practice of Time-Names.

Time-Names. Time-names should not be used in connection with the first practice of the art of beating time, but should only be taught in connection with the study of staff-notation; and not then, until the sense of time and time has a certain degree of development. They will then be found a most valuable auxiliary in the study of singing at sight, provided they are used always with the beating of the time by the hand. A keener sense of rhythm will thus be established in the mind of the pupil, especially as regards the minute subdivisions of measure, enabling him finally to grasp with ease and confidence the Motives, Sections, and even Phrases of his exercises and songs.
ILLUSTRATIVE LESSONS

PREPARATORY TO THE NEW SECOND SERIES MUSIC CHARTS, AND
NEW SECOND MUSIC READER.

For pupils from eight to ten or eleven years of age.

LESSON I.

Teacher. Many of you can sing several songs which you have learned by rote, or by hearing other people till you were able to join in singing them; and it will be very pleasant for you to learn more songs in that way. You are now old enough to take pleasure in learning to read music, as you can now read words which you at first learned to speak by hearing other people talk, or by rote. If you are very attentive, and all who can sing will do the best they can, you will make rapid progress.

All listen to me!

[Teacher sings.]

\[\begin{array}{c}
\text{\small \{$\sharp\$\} 4 \\
\text{L, a, l, a, l, a, l, a, l, a.} \\
\end{array}\]

T. All may sing as I did.

[Eight or ten of the class sing correctly, and the teacher should be very careful to let the whole class share the credit.]

T. That is very well. I will sing again, and you notice in which direction my voice seems to go in passing from one sound to another.

[Teacher sings the ascending scale.]

Pupils. Your voice went up as by steps.

T. That is a very good answer. Listen again, and notice which way my voice goes.
P. Your voice went down.
T. Yes. I will sing upwards, as I did at first, and you count the number of sounds I sing one above the other.

[Teacher sings the ascending scale.]

P. Eight.
T. You may sing eight sounds, as I did.

[A large proportion of the pupils sing correctly.]

T. I am glad to hear so many of you sing so well. These eight sounds are called “The Scale,” or “Musical Ladder.” They are named from the lowest sound upwards, thus: One, Two, Three, Four, Five, Six, Seven, and Eight. Instead of writing the names out in full, it is usual to write only the figures, 1, 2, 3, 4, 5, 6, 7, and 8. I have drawn eight lines, one above another, to represent the Scale or Music-Ladder, and have written the figures upon the lines; also, the syllables Do, Re, Mi, Fa, Sol, La, Si, Do, which are sometimes sung instead of the Scale-names, as they sound better. As soon as you know the sounds of the Scale well enough, you should be able to sing any sound with the syllable La, or any other syllable, when called for.

These eight sounds of the scale not only differ in pitch, but they may also differ in length. We are at present enabled to tell the pitch of a sound by its scale-name, and also by its syllable.

We need now to be able to tell how long to sing a sound. If the class will be very attentive, I will try to show them how to do this by means of beating the time.
LESSON II.

DICTATION-EXERCISES UPON THE SCALE,

WITH BEATING TIME.

TWO-PART MEASURE.—SOUNDS ONE BEAT LONG.

Teacher. You may all rest, now, and listen to me; but be very attentive, and notice what I do.

[Teacher beats and sings.]

1. 

La la la la la la la la la la la la la la la la la.

T. What did I do?

Pupils. You sang two of each of the sounds of the scale.

T. You may sing as I did, beating the time.

[It is done correctly.]

T. That was well done. You may sing the scale downward, beginning with Eight, in the same way as you sang it upward.

[The pupils do it correctly.]

T. I fear you will become tired if you sing all the time; so I will form the class in two divisions, in order that one division may rest while the other sings.

Those on my right we will call the First Division, and those on my left, the Second Division.

I wish you to sing the scale up and down in this way, namely: the First Division to sing the first measure, and the Second Division to sing the second measure, and so on.

You must continue to beat the time, whether you sing or not. In this way each division will rest during every other measure.

Now! all ready, and see if you understand what I want you to do.

[Enough of the pupils in each division understand so as to do it very well.]

T. You have done that much better than I thought you could.
INTRODUCTION.

SOUNDS TWO BEATS LONG.

_T._ You may all rest, now, and listen to me. Notice what I do.

[Teacher beats and sings.]

\[\text{La la la la la la la la la la.}\]

_P._ You sang each sound of the scale two beats long.
_T._ You may beat and sing as I did.

[Pupils beat and sing correctly.]

SOUNDS ONE BEAT AND TWO BEATS LONG.

_T._ Listen to me again, and tell me if I sing something new.

\[\text{La la la la la la la la la la la la.}\]

\[\text{la la la la la la la la la la.}\]

[The pupils will not comprehend this so readily as the exercises presented before. If they fail to understand by singing La, the teacher may sing the syllables. This will make it easier to perceive that the first three sounds are of the same pitch, and so on; then the pupils will be able to turn their attention to the difference in length. Lead them to know that there are three Ones, the first two being each one beat long, the third two beats long, and so of the other sounds of the scale.

Require the pupils, first to sing the exercise by the scale-names; second, by the syllables. Have the pupils sing by divisions,—two measures each. If not too tiresome, have the exercise sung downward, repeating the Eight.

If the pupils have not become quite proficient in beating two-part measure at this stage, it will be well to give further special attention in this direction before proceeding to the next lesson, which is in triple time; as a proper performance of beating three-part measure will depend largely upon their proficiency in two-part measure.]
INTRODUCTION.

LESSON III.

DEVELOPMENT OF THREE-PART MEASURE.

T. Who can tell what I sing now, that is different from anything I have sung before.

[Teacher sings.]

\[\begin{align*}
    \text{La la la la la la la la la la la la la la la la la la la la la la la la la la la la la la la}
\end{align*}\]

P. You sang three, of every sound of the scale.

T. Yes. I will sing the same again, and you may tell me which one of the three I sing loud.

[Teacher sings.]

P. You sang the first of the three loud, and the other two soft.

T. Yes. You may sing as I did.

[Pupils sing correctly.]

T. That is right. This kind of measure, with three parts—one loud and two soft—is called a three-part measure.

LESSON IV.

SPECIAL DRILL IN BEATING TRIPLE-TIME.

T. In three-part measure, there are three different motions of the hand. The first beat is the same as in two-part measure. The second beat is made by bringing the hand smartly to the left, so as to touch the body. The third beat brings the hand into position for the down-beat of the following measure.
INTRODUCTION.

[The pupils are to practise this kind of measure, saying, while beating, Down, Left, Up, till the class can do it perfectly, accenting the down-beat. When this is accomplished, they will be able to do the following dictation exercises.]

EXERCISES IN THE SCALE WITH TRIPLE TIME.

T. I will sing the last exercise while beating, then I want you to do it.

[The teacher sings the exercise and the pupils do the same, being careful to accent the down-beat.]

T. That is very well. Now you may sing it, by divisions, one measure at a time, up and down the scale.

[This is done correctly.]

LESSON V.

FOUR-PART MEASURE.

T. You may sing four of each of the sounds of the scale, by the syllables.

[The pupils sing.]

T. That is very well. You may sing the same exercise again, and accent the first and third sounds in each measure, the first a little louder than the third.

[The pupils sing the exercise very well. The leading singers show that they feel the time, or recurrence of the accent,—some by an extravagant nod of the head, some by throwing forward the whole body, and others by stamping their feet,—all quite unconsciously.]
T. You observed the accented parts very well; but it was very funny to see the different motions you made as you became interested in keeping the time. Regular practice in beating the time, will prevent these awkward motions of the body and stamping of feet.

[The pupils may now take position for beating four-part measure.]

T. The four beats in Quadruple Time; are: Down, Left, Right, and Up.

The Down beat is made the same as in double and triple time, by bringing the tip of the middle finger of the right hand into the centre of the palm of the left.

The Left-beat is made like that of triple time.

The Right-beat is made by bringing the fingers of the right hand from the body onto the fingers of the left hand.

The Up-beat is made by bringing the hand up again to the position for making the Down-beat.

Now sing—by the syllables—the last exercise, beating the time.

The pupils do as directed.

T. Now sing by divisions, up and down.

[The pupils do it correctly.]

T. I am very glad you have become so much interested in learning how to sing the scale, in the different kinds of time, that you have not asked for any songs. If you go on in this way, you will soon be able to read music well enough to learn songs by the notes, without having ever heard them sung before.
READING MUSIC FROM FIGURES.

EXPLANATORY.

Pupils are supposed to have already had so much explanation and practice in the major scale as to be able to sing the sounds in order, ascending and descending; also to sing any sound of the scale by the syllables, when called by the teacher. In dictation-exercises, the teacher should always call the sounds by the scale-names, but the pupils should sing the syllables in response.

They are also supposed to have been taught:—Double time, including the manner of beating the same, as Down-beat and Up-beat, accenting the Down-beat; Triple-time, with the manner of beating the same,—Down-beat, Left-beat and Up-beat, accenting the Down-beat; Quadruple-time, with the manner of beating the same,—Down-beat, Left-beat, Right-beat and Up-beat, accenting the Down- and Right-beats.

For convenience in reading music, the measures are indicated by vertical lines called bars. At the end of an exercise or tune, two lines are used, called a double-bar.

Pupils are now told that, instead of the teacher calling the sounds of the scale, they are to sing from the figures, 1, 2, 3, 4, 5, 6, 7, and 8. This will be reading the sounds of the scale by figures.

As to the length of sounds, they are to be made to understand:—

1. That a figure with a comma after it means that the sound is to be one beat long.

2. That a figure with a dash after it means that the sound is to be two beats long.

3. That a cipher with a comma after it means that we are to rest, or keep silent, one beat; and a dash after a cipher means that we are to rest during two beats.

By this arrangement of figures, with commas and dashes after them, we know which sound of the scale to sing, and how long to sing it; also, how many beats to rest or keep silent.

The teacher will explain the above from the blackboard, and then practise from the books.
INTRODUCTION.

What makes it more difficult to read music than it is to read common language is, that in reading music you have to think of two things at the same time:—

First, you have to think which sound of the scale you are to sing. Second, you must think how long you are to sing each sound; so that learning to read music correctly and intelligently causes us to think quickly, and do things accurately, more than any other study.

Third, if you sing the words of a song or exercise, instead of singing the scale-names or syllables, Do, Re, Mi, Fa, etc., it increases the difficulty very much. For that reason, you should practise easy music with words, that you may overcome the difficulties all by yourselves. You should also have credit for it, as well as in your other studies.

REGULAR NOTATION.

The foregoing plan, of reading only by the figures or syllables of the scale, does very well to begin with; but you should soon outgrow this grade of musical existence, as a frog outgrows the tadpole and breathes no longer as a fish, but with head out of water.

All you have learned of the scale and measures in the preceding lessons we shall retain; and it will aid you very much to understand the reading of music by the regular notation. We will add to the scale diagram the pitch-names of each sound.

(1.) The pitch of sounds is named by the first seven letters of the alphabet: a, b, c, d, e, f, and g.

(2.) You see by the diagram, that the pitch of One is c; Two is d; Three is e; Four is f; Five is g; Six is a; Seven is b; and Eight is c.

(3.) You will notice that c is used as the pitch for both One and Eight. We distinguish the c's by the number of marks over them; the pitch of One is called "once-marked c" and of Eight, "twice-marked c."

(4.) Upon the fifth degree of the scale you will observe this character, which is called the \( \text{f} \)-Clef or Key, and always stands for that letter or pitch.

We have already sung exercises in three kinds of measures: Two-part measures, Three-part measures, and Four-part measures.

You will need no further instruction about measures for our present practice; only you must remember that the first tick or count of every measure is louder than the others; or, is "accented."
LESSON II.

NOTES AND RESTS.

I will explain to you the different kinds of notes used to show the difference in the length of sounds; also the rests, which show how long to be silent. This is best shown by four-part measures, in the following manner:

T. Tell me how many La’s I sing while drawing the circle.

[Teacher makes a circle while she sings, thus:]

\[
\text{\includegraphics{circle}}
\]

\[
\text{\includegraphics{notes}}
\]

La la la la la.

P. Four.

[Teacher makes the dividing lines, thus:]

T. I have divided the circle into four equal parts. What is each part called?

P. A quarter.

[Teacher points to each quarter while she sings.]

\[
\text{\includegraphics{notes}}
\]

La la la la la.

T. How long was that sound which I sang to each quarter?

P. One tick or count.

[Teacher places a quarter-note in each quarter of the circle, thus:]

\[
\text{\includegraphics{notes}}
\]

T. I will write a note in each quarter which shall stand for a sound one tick or count, and will name them Quarter Notes.

T. You may tell me how many sounds I sing while drawing another circle.
Teacher draws and sings:

\[\text{La la.}\]

\[P. \quad \text{Two — each two quarters long.}\]
\[T. \quad \text{I see you comprehend what I am “up to.”}\]

Teacher, dividing the circle into halves by a horizontal line, and then into quarters by dots vertically, places half-notes upon the dotted lines dividing the quarters, thus:

Teacher draws a circle and sings:

\[\text{La.}\]

\[T. \quad \text{How many sounds did I sing in this circle?}\]
\[P. \quad \text{One.}\]

Teacher divides the circle into quarters by dots, and places a whole note in the centre, thus:

\[T. \quad \text{This note lasts through all the four quarters.}\]
\[\text{If we call the notes in the first circle quarter-notes and those in the second, half-notes, what name shall we give to this last note?}\]
\[P. \quad \text{A whole-note.}\]
T. Yes. Only the most attentive will be able to tell me how many I sing in the next circle.

[Teacher draws a circle, divides it into quarters, and sings.]

La la la la la la la la.

P. Eight!

[Teacher divides each quarter, thus:]

T. Yes: I sang two sounds to each quarter. You sing two sounds to each quarter while I point.

[Pupils sing correctly.]

T. How many equal parts in this circle?

P. Eight.

T. I will write the notes, two of which are equal to one quarter.

[Teacher writes an eighth-note in each part, and asks:]

T. Can you tell me the name of these notes?

[Pupils will probably give the right name; if not, tell them.]

T. I will name each of these eight parts in a way which will be easy for you to tell. I will name the first part of each quarter of the circles just as we did in the first circle, and the second part of each quarter we will call "&."

[Teacher writes.]

T. We have four different kinds of notes. I will place the circles all in a row, and will place the notes on a line under them.
LESSON III.

RESTS.

[Teacher draws four circles, divides them as above, and proceeds as follows.]

T. Notice which parts I sing, and which parts I rest.

[Teacher sings the first and third parts.]

P. You sang at the first and third parts, and rested at the second and fourth parts.

T. I will write a quarter-note in the parts where I sang, and a quarter-rest where I rested.

[Teacher writes in the first circle.]

T. Tell me which parts I sing in the next circle.

[Teacher, pointing, sings the first two quarters and rests the last two.]

P. You sang the first half, and rested the other half.

T. Yes; and I will write a half-note for the first two quarters, and a half-rest for the last two.

[Teacher writes in the second circle.]

I will write a whole-rest in the third circle, which shows you are to rest during the four quarters.

[Teacher writes in the third circle.]

You will observe that the half-rest is above the line, and that the whole-rest is below the line.
INTRODUCTION.

T. Tell me which parts I sing, in the first two quarters of the fourth circle, and in which I rest.

[Teacher sings.]

P. You sang one and two, and rested at the &s.

T. I will write eighth-notes where I sang, and eighth-rests where I rested. I will commence again, and sing all around, and you notice how I sing the third and fourth quarters.

[Teacher writes, and again sings.]

P. You sang both parts in the third quarter, and sang the first part of the fourth quarter, and rested on the &.

[Teacher writes in the remaining divisions of the fourth circle.]

T. Under the four circles containing rests I will place the notes and rests, on a line.

THE STAFF.

Music is written upon five lines and the spaces between the lines. The lines and spaces, called the Staff, are named from the lowest upwards, thus:

Fifth line.
Fourth line.
Third line.
Second line.
First line.

Fourth space.
Third space.
Second space.
First space.

Sometimes the spaces below and above the staff, and also short added lines are used, thus:

† Those desiring to use the Time-Names, should carefully read the Appendix, p. 179. It has been expressed by many able teachers, that those schools which for the next five years shall in their exercises require beating time with the hand, with the proper use of the Time-Names, will excel in "Sight-Singing." The author can testify to a trial of them for three years in Japan, under the most favorable circumstances for testing their value, with results in the highest degree satisfactory.

TRIPLE OR THREE-PART MEASURE.

Have the class take position for beating time.

The down-beat is made the same as the down-beat in double time. The left-beat is made by bringing the hand smartly against the body, and holding it there, till the time comes to make the up-beat, which is done by bringing the hand quickly to the position for making the down-beat again.

See how the setting sun fades in the west,

See how the setting sun fades in the west!

Let us sing a merry lay; Sing we ever while we may.
COMMENCING WITH THE UP-BEAT.

This is an exercise in beating triple time, commencing with the up-beat. Let the hand be placed firmly against the body before commencing; then commence promptly, by a sign from the teacher.

Thou star of the night, so high and so bright,
I gaze on thy beauty with heartfelt delight.

Let us join hands; Let us join hands;
This pledge of love, friendship ever demands.

* The question-mark will always indicate a point requiring special attention.
35.

Let ev'ry creature sing praise to the Lord,

Let ev'ry creature sing praise to the Lord.

36.

SOUNDS LASTING ONE MEASURE.

In saying Tā-a-ē, the sound is started with the down-beat, and the vowel sounds are changed with the left- and up-beats; the consonants being omitted.

37.

To the wood come!

There 'mid the singing of birds let us roam.

38.

39.

40.

Kind, protecting God in heaven, Good-ness from thee ever flows.

Thou hast sent me sweetest slumber, Strengthened me with sweet re-pose.
In No. 42 we have quadruple or four-part measure for the first time. It is better to designate the parts of measures by the order of the beats than by counting the time as in instrumental music; retaining the figures or numerals only to designate the degrees or sounds of the scale.

**MANNER OF BEATING QUADRUPLE TIME.**

1. Take position for beating time.

2. The down-and left-beats are performed as in triple time. The right-beat is made by bringing the right hand from the body to the fingers of the left hand. The up-beat is made like the up-beat in double time.

The advantages on the score of discipline will abundantly compensate for the trouble of securing strict uniformity in beating time, apart from its use in the study of music.

Let the teacher persevere in this matter till the pupils can do it well.

**THE TIME-_NAMES IN QUADRUPLE TIME.**

The time-names in quadruple or four-part measure are:

- For the Down-beat, Tä: e as in fär.
- For the Left-beat, Tä: a as in fâte.
- For the Right-beat, Tê: e as in mé.
- For the Up-beat, Tê: e as in mêt.

Quadruple time is accented on the down-and right-beats.

I shall dwell in peace and plen-ty, If my soul con-tent-ed be.

EXERCISES IN FIGURES, TO BE WRITTEN IN NOTES.

Explanation.—A comma after a figure, signifies a quarter-note, thus: 1, = \(\textsuperscript{1}{4}\)
A dash after a figure, signifies a half-note, thus: 1, = \(\textsuperscript{2}{8}\)
A comma after a cipher, stands for a quarter-rest, thus: 0, = \(\textsuperscript{1}{8}\)
A dash after a cipher, stands for a half-rest, thus: 0, = \(\textsuperscript{1}{4}\).

The key in which the exercise is to be written is denoted by a capital letter; and the time, by the usual signature.

The pupils should sing the above exercises from the figures, beating the time, before writing them in notes. It is recommended that only one exercise be taken up at one lesson, in the following order, namely:
1. Teacher writes the exercise in figures upon the blackboard.
2. Pupils sing it by the (a) scale names, (b) pitch names, and (c) syllables.
3. Write the exercise in notes upon the staff.
4. Pupils pass their slates to each other, who examine and mark errors.
This should all be done in six or seven minutes, and is as good an intellectual exercise as arithmetic or grammar.
TRUST IN GOD.

1. Tho' I wander blindly, Till in death I sleep,

God the Lord will kindly Me in safety keep.

2 He whose love hath won me Still to trust his care,

Will not put upon me More than I can bear.

3 And should care oppress me, Near him will I stay,

So his love shall bless me Every coming day.

THE WATER-LILY.

1. Beside the blue lake there was strolling one day,

A wilful young boy, all intent on his play.

2 And 'mid the green rushes he saw growing there

A beautiful lily, so white and so fair.

3 "Oh, that I must have!" cried he, eager with joy;

And into the lake went the heedless young boy.

4 "Stay, stay!" cried his mother, all trembling with fear,

"Oh, stay! for too deep is the water so clear."

5 He heeds not her bidding, he stays not to hear;

"No, no," answered he, "there is nothing to fear."

6 He grasped at the flower — but nothing could save;

He sank, and was lost in a watery grave.

* Take breath at this mark (*) and at reeds.
The Lord is great, and greatly to be praised,
And wondrous are his mighty works.

3 The bond that cannot perish,
   To friendship's bond, we 'll sing;
The brother that we cherish,
The home to which we cling.

4 The man who's ready ever
   To lend a helping arm;
The noble heart that never
Will do his neighbor harm.
THE NEW SECOND

TWO SOUNDS OF EQUAL LENGTH IN EACH PART OF TWO-FOUR MEASURE.

\[
\begin{array}{c|c|c|c|c|c}

\hline
\text{Ta} & \text{fi} & \text{Ta} & \text{fa} & \text{Ta} & \text{fa} \\
\end{array}
\]

When there are two sounds of equal length in each part of the measure in Double-time, they are named in their order, respectively, Tā, fā, Tā, fā, — as in the above exercise.

The pupil should be led to observe:—

1. When there are two sounds of equal length in one part of the measure, the first is sung with the beat, and the second after the beat; so, in the first measure in the above exercise,—

   Tā comes with the down-beat,

   fā comes after the down-beat,

   Tā comes with the up-beat, and

   fā comes after the up-beat; or,—

2. By another statement: when there are two sounds of equal length in either the first or second part of a measure in Double-time, the first of the two sounds comes with the beat, and the second after the beat.

\[
\begin{array}{c|c|c|c|c|c}

1. Heav'n-ly Fa-th-er, sov-reign Lord, Be thy glo-ri-ous name a-dored!
2. Tho' un-wor-thy, Lord, thine ear, Deign our hum-ble songs to hear;

Lord, thy mer-cies nev-er fail! Hail, ce-les-tial Good-ness, hail!

3. While on earth ordained to stay,
   Guide our footsteps in thy way,
   Till we come to dwell with thee,
   Till we all thy glory see.

   We will wake a nobler strain;

   Our triumphant voices raise.

She flies now like an arrow, tra, la, la, la!
Oh, sparrow dear, the kittens there
The feast will share! tra la, la, la, la, la!

FROM THREE-EIGHT TO SIX-EIGHT TIME.

All six-eight measures should be considered as being made up of two three-eight measures, as in the following example.

In the above example, the beats and Time-Names are the same for a and b. The chief difference between three-eight and six-eight time is in the accentuation. In three-eight time the accents are all alike. In six-eight time there are naturally two accents, the first being stronger than the second.

In quick six-eight measure, it is better to mark the time with two beats; the first half of the measure by a down- and the second by an up-beat, as above (c).
THE NIGHT IS GONE.
COMMENCING WITH Të, AFTER THE UP-BEAT.

1. The night is gone, the day is here, And still I live and move:
2. Lord, ev’ry blessing comes from Thee, Thou who canst all things do!
3. All that I do to Thee is known, Who dost my wants supply;
   My rising-up and lying-down Are subject to thine eye.
4. Should I in wisdom’s ways be found, And strive to do the best,
   Love shall encircle me around, And peace be in my breast.

The God that governs all the year, How constant is His love!
Oh, how much good dost thou to me From day to day re-new!

MOLLER.
The pupils should be led to see that, in the second measure, the dotted quarter-note lasts till the two beats are perfectly performed; and that the eighth-note which follows should be sung when the hand is at rest, after the up-beat.

PREPARATORY EXERCISES.

TWO-PART SINGING.

Divide the class into two equal parts, each part having an equal number of leading singers. This will be the first step in selecting the voices for two-part singing. Dr. A. B. Marx pursues a similar course without saying much about it. The pupils should beat the time.

1.

If there are boys and girls in the class, let the girls form the first division and the boys the second. Then change parts, the boys singing very softly on the upper part.

2.
Great care should be taken that the first division sing very softly and distinctly. If any of the pupils cannot sing the upper notes easily, they must sing in the second division. If some of the pupils sing out of tune, they should listen a while, but care should be taken not to discourage them.

In the following exercise, the first division have three sounds of the upper scale and the second division have five sounds of the lower scale.

Exercises like the above, will tend towards the acquirement of two important arts in reading music:
1. “Leading off” and “coming in.”
2. Learning to listen to other parts while singing one’s own.
LISTENING WHILE SINGING.

Each singer must be able to hear the other part, and follow its import, while he sings his own.

It is of no use to tell a pupil to mind his own business,—"to sing his part without thinking of the other." He cannot do it, because he is not deaf! If he could, it would not be desirable, as one part would be very apt to "outcry" the other: to sing out of tune and out of time with it. Besides, such a thing deprives a singer of the enjoyment of the harmony; and again, it prevents that union of feeling which is so essential to the proper expression of a piece. The ground-work of the ability to hear, enjoy, and execute "harmonic song" lies in the ability to hear (and understand), enjoy, and execute thirds and sixths, especially the former, in two-part song, which is the simplest and first used.

Thirds "begin and complete" all chords. With sixths, which are but inversions of thirds, they furnish most valuable practice, of which we can hardly have too much.

Dr. A. B. Marx.

TWO-PART SONG. BREAKING IN.

[Breaking in.—The act of training, as of "breaking in" a horse.—Worcester.]

The teacher will explain how two parts are written on one staff: First, That when the measure or whole-rest is over the note it belongs to the upper part, as in the first measure; when it is below the note it belongs to the lower part; and that the quarter rest, as in the third measure belongs to both parts. Second, That the stems of the notes for the upper part point upward, and those for the lower part downward.

Suggestions to Teachers.

Let the two exercises below (15a and 15b) be studied in the following order:

As to Time.—First, Beat the time, naming the beats, commencing Up, Down, Left, Right, etc. Second, Beat the time, saying the Time-names instead of naming the beats. Be careful to whisper the rests.*

As to Pitch.—First, Say the scale-names without beating the time; Second, Say the pitch-names, without beating the time; Third, Sing the syllables, beating the time; Fourth, Never stop a class after they have commenced to sing an exercise or tune, so long as any one in the class is singing right, though all the rest fail. Make corrections and give further explanations after the courageous pupil has carried the exercise through.

15a.

If any of the pupils, especially the boys, find it difficult to reach the high notes, they may cease to sing them. It will be much to their credit if they can stop singing when the sounds are too high, and come in when the notes fall within the pitch of their voices.

The following song has both the above exercises on one staff, with words.

* A great deal has been said as to the doubtful utility of beating time with the hand. A careless manner of beating time is as bad as a clock out of order, or so imperfectly constructed that it “does not keep good time,” and is worse than useless. Beating time should be according to a method, strictly adhered to: the motions should be uniform, that is, all the class should be trained to make the movements of the hands alike, and with the utmost precision.

1. Re-fresh'd by gen- tle slumbers, From care and sor-row free,

Our hearts in tune-ful num- bers Sing praise, O Lord, to Thee.

2 Thou spreadest joy and blessing, Thou Source of ev'ry good;
Then hear us, Thee addressing in songs of gratitude.

3 Oh, may we, ceasing never, Extol Thee all our days;
Our hearts and life be ever An endless song of praise.

MORNING AWAKETH.

(May be transposed to B-flat.)

Dr. Marx.

1. Morning awaketh, darkness is gone,
2. Birds with their music fill the pure air;

In the bright heavens shineth the sun,
Flow'rs their fragrance breathe everywhere.

3 Brightly the dew-drops shine on the grass;
   Bees through the meadows hum as they pass.
4 All is so joyful, all is so blest,
   Calmness and pleasure fill ev'ry breast.

From all their blooming bowers, Sweet clouds of incense rise.

3. The birds, in Spring rejoicing, Sends from its hidden bosom
   Soar high in ether clear, An offering, Lord, to thee.
   And warble many an anthem
   Ne'er meant for mortal ear.

5. All good from thee o'erflowing
   On each created thing,
   Life, light, and joy bestowing,
   Returns to thee, its Spring.

4. And many a desert blossom, Which eye will never see,
   Sends from its hidden bosom

Pursue the same method in teaching two-part songs, viz.,—First, Let all the class sing the second or lower part, and then the first, or upper part, as though there were no words; Second, When they know both parts, apply the words.

SUNDAY SONG.

1. To-day a solemn stillness Is resting far and near;
2. The Sabbath bells are ringing, So cheerful and so clear,
And so may we, with gladness, God's holy day revere.
The call to pray and sing, And God's good word to hear.

3 Who would not heed the message God sends us from above?
Who would not seek his blessing, His mercy, and his love?

4 And as the Eastern sages Were guided by a star,

So faith will lead us heav'nward, Where God and angels are.
5 Once with our heav'ly Father, No griefs to us can come;
We'll dwell in peaceful pleasures In that eternal home.

OUR FATHER.

moonlight, And the blessed sunlight,—He
helpeth and watcheth both thee and me.

2 He who guides the river,
Gliding onward ever,
Never asking whither,—
He watcheth and guideth both thee and me.

3 He who made the flowers,
Hills and woods and bowers,
Tempests, clouds and showers,—
He helpeth and watcheth both thee and me.
PART II.—THE CHROMATIC SCALE.

LEARNING MORE ABOUT THE SCALE.

1. There are eight sounds in the scale.
2. They are named One, Two, Three, Four, Five, Six, Seven, Eight, represented by the figures 1, 2, 3, 4, 5, 6, 7, 8.
3. These eight sounds differ in pitch.
4. By pitch is meant the rising and falling of the voice, as in singing, step by step, up or down the scale.
5. The difference of pitch between two sounds of the scale, as between One and Two, Two and Three, Three and Four, etc., is called an Interval.
6. There are two kinds of intervals in the scale, large and small.
7. The large intervals are called Tones.
8. The small intervals are called Semitones.
9. The scale is used to measure the difference of pitch between sounds, as a yard-stick is used to measure cloth and the like.

All the exercises and songs thus far have been in the key of C.* By that is meant that the pitch of One has always been c. We are now to study exercises and songs in other keys.

When the scale is based on any other pitch than that of c, it requires the introduction of one or more sounds not found in the "natural" scale. These extra sounds are found in what is called the Chromatic Scale.

---

*I do not sympathize with those who entertain so much anxiety about becoming too familiar with the key of C. There are other difficulties than those of tune to be encountered and overcome. After the pupils have mastered the scale so as to read readily in the key of C, let them in that key wrestle with some of the hard things in time.

The "ox" and the "ass" may become so much accustomed to persons and places as to be unhappy in consequence of any change; but I find no difficulty with children nine years of age, in changing the places as to the pitch of the scale. After they have become familiar with one place, they are quite curious to know others. All the difficulties that have been overcome in one key, as to tune and time, are under our feet forever in all the others.

That good old rule, "Learn to do some one thing well, and every thing else by that," is especially to be applied in the art of reading music from the staff, in the various keys.
which is made up of First, the eight sounds of the natural scale, which you have already learned, and Second, others, coming between such sounds of the natural scale as form intervals of a tone.

**THE CHROMATIC SCALE ASCENDING.**

You see by the diagram that there are five new sounds—just as many as there are large intervals or tones in the scale. You will observe that the new sounds have this sign (♯) called a Sharp, before each of them. It always indicates a sound one semitone higher than that named by the letter alone.

According to the diagram, the scale-names of the chromatic scale, commencing with C, are: One, Sharp-One, Two, Sharp-Two, Three, Four, Sharp-Four, Five, Sharp-Five, Six, Sharp-Six, Seven, Eight. When we say the pitch-names, the letters are called first, as c-sharp, d-sharp, f-sharp, g-sharp, and a-sharp.

The best way to hear how the chromatic scale sounds is to strike the key, upon the piano, and then every key, white and black, up to C. A good cabinet organ will do as well, if not better.

The chromatic scale ascending appears on the staff thus:

---

**Scale-Names.** 1 1 2 2 3 4 5 5 6 6 7 8
**Pitch-Names.** c c ♯ d d ♯ e f ♯ g ♯ a a ♯ b c
**Syllables.** Do Di Re Ri Mi Fa Fi Sol Si La Li Si Do
**German Pitch-Names.** c cis d dis e f fis g gis t a aist b c

The chromatic scale is not to be sung as above, but as follows:

---

*The German chromatic pitch-names are more convenient to sing than the English, because they can be said with one syllable. Dr. A. B. Marx, a great German writer on the teaching of singing, says that the difference of pitch is very much clearer in the mind when we say c, cis, than when we say c, c-sharp; and so of the other chromatic sounds.*

† Pronounced with y hard as in give.  ‡ Pronounced ice.
Although any of the above chromatic sounds may appear in easy music, sharp-four is most frequently used, as in the following exercise.

**MORNING SONG.**

1. Morning's golden light is breaking; Tints of beauty paint the skies;

Morning's feather'd choir are waking, Bidding me from sleep arise.

2. Well, I'm ready; quiet resting has restored my weary pow'rs;
   I'll again, all sloth resisting,
   Labor thro' the day's bright hours.

3. But with thanks let me remember Him who gave me quiet sleep;
   Let me all his mercies number,
   And his precepts gladly keep.

4. When I leave the downy pillow, Which so oft has borne my head,
   Sure it's right a time to hallow To the Hand that kept my bed.

5. Let me never prove ungrateful,
   Let me never thankless be;
   From a sin so base and hateful
   May I be for ever free!
THE CHROMATIC SCALE DESCENDING.

When we name a chromatic from the upper of the two sounds between which it occurs, we use the word flat, meaning a semitone lower than the natural sound from which it is named; so the sign which means a semitone lower is called a flat, and is made thus: ♭.

The chromatic scale descending, in which the intermediate or chromatic sounds are represented by flats, appears upon the staff thus:

We have spoken of the first regular sounds of the scale being called natural, and of the intermediate sounds, chromatic. Besides the characters which are called sharp and flat (♯ and ♭), we have a character called a natural, (made thus, †), which is used to take away the effect of either the sharp or the flat.

Among the flat sounds that occur in singing, as chromatics, flat-seven will be met with most frequently.

* Pronounced acc.  †Pronounced with y hard, as in get.
3. FLAT-SEVEN.

ACCIDENTALS.

When sharps and flats appear in exercises and songs,—as in the second measure of Exercise 3 and the fourth measure of "Morning Song," page 46, and in the exercise with flat-seven,—they are called Accidentals.

"Songs are more numerous with accidental sharps and flats than without them; the singer must therefore make himself acquainted with the use of these characters."

The pupils need not be afraid of these accidental notes; they will be just as easy to sing as the scale itself. The flat-seven will require a little more thinking at first than sharp-four, as in the following song.

BEGINNING OF SPRING.

LIVELY.

1. The Spring again appeareth, The Spring our hearts that

cheer eth! The birds proclaim it on the tree, The

scented flowers tell it thee! The Spring again appeareth!

2 Ye see it in the meadows,
And 'mid the forest's shadows;
The cuckoo calls, the linnet sings,
And with delight all nature rings,
For Spring again appeareth!

3 Here buds their heads are raising,
Here peaceful flocks are grazing;
Ah! see how ev'ry heart is glad,
How Earth is in her beauty clad,
For Spring again appeareth!
EXERCISES IN CHROMATIC SOUNDS.

First Step.—The pupils should be able to sing at sight the following exercise, without hesitation or making a mistake.

1.

Second Step.—The second and third measures in the following exercise will be found to be just as easy to sing as the first and fourth measures. The pupils should beat the time.

2.

Third Step.—The same exercise with the second part of each measure left out. The pupils should think of the sounds left out.

3. ?  ?  ?  ?

Fourth Step.—In Exercise No. 4, the teacher is to decide how much to assist the pupils.

4.

The teacher will explain the use of the natural (♮) in the last section.

Fifth Step.—If the previous exercise is well mastered, the following will be easy to sing.

* The question-mark indicates that there is something special to think about.
The following is a similar exercise in three-four time.

Like a river shining ever Is the heart of Innocence,
Finding pleasure without measure, In the work of Providence.

The time in the following exercise should be thoroughly mastered.

FLAT-SEVEN AND SHARP-ONE.
FAITH, LOVE AND HOPE.

WITH FEELING.

1. Tho' Faith de-spair and wa-ver, A day of joy draws near, Our

home-ward path to cheer With light that shineth ev - er.

2 Tho' Love may meet with sorrow,
   Yet should it not repine,
   A morning star shall shine
To greet us on the morrow.

3 Tho' Hope with fear be shaken,
   And all in darkness lie,
   A morning draweth nigh,
The sleeping to awaken.
KEY OF G.

By the Key is meant the pitch of one of the scale.

[The teacher will place Chart No. 25 before the class, and lead the pupils, somewhat as follows, to observe that the only difference between the key of G and the key of C is in the pitch.]

*Teacher.* The diagram represents two scales, one above the other. What is the pitch of one of the upper scale?

*Pupils.* Once-marked g.

*T.* [Gives the pitch g, and dictates:] Sing the scale-names of the upper scale up and down.

Sing the syllables.
Sing the pitch-names.

What is the pitch of eight of the lower scale?
Sing the lower scale, descending and ascending, by the scale-names; by the syllables; by the pitch-names.

*T.* What chromatic sound do we find in this key?

*P.* F-sharp or fis.

*T.* Upon which degree?

*P.* Upon the seventh degree.

*T.* Why is f-sharp used instead of f?

*P.* To make the intervals right between six and seven, and between seven and eight.

The diagram appears upon the staff; thus:—

1.

The teacher will explain that as f-sharp or fis is peculiar to this key, it is placed upon the fifth line of the staff, just after the clef, as its signature or sign, and answers for the lower scale also.
The scales, as they have been sung from dictation, appear on the staff, with the signature, as follows:

   A, a, a! Now comes the mer-ry May.

2. E, e, e! A hap-py band are we, Af-ter A-pril's
   gen-tle show-ers, Comes sweet May, with fra-grant flow-ers.
   E, e, e! A hap-py band are we.

3  I, i, i! To snow we've said good-by;
         From the school-room hopping, skipping,
         I, i, i! To snow we bid good-by.

4  O, o, o! Now merrily we go;
         Violets in the fields are springing,
         O, o, o! Now merrily we go.

5  U, u, u! I know what we will do:

13. THE BEAUTIFUL WORLD.

C. H. Hohmann.

1. How love-ly is this world! Here man-y joys to us are giv'n,
2. It is no vale of tears! For God hath made it pass-ing fair,

Bless-ings fall on us all; How love-ly is this world!
Good and fair, pass-ing fair; This is no vale of tears!

3 The fields in green array'd, The cheerful sunshine warm and bright,
   For our joy, for our joy, Our great Creator made.
4 He made the fountain, too; The field, that gives us daily bread,  
He did make for our sake,— Our God so good and true.

5 He gave us parents good, Who, that we may good children be,  
And may thrive, ever strive! He gave them for our good.

6 God made these for our sake! Then, whether rain or sunshine be,  
Courage take, for his sake! O children, courage take!

GOD THE LORD.

1. Canst thou count the stars that nightly Glister  
in the azure sky? God the Lord the number  
know-eth Of the wonders that he show-eth, In their  
count-less varied forms.

2 Canst thou count the insects playing  
In the sunshine’s glowing light?  
Canst thou count the fishes straying  
In the sparkling waters bright?  
God the Lord a name has given  
To all creatures under heaven,  
||: When he called them into life. ||

3 Canst thou count the children daily  
Rising from their beds at morn,—  
Going forth to wander gaily,  
By no care or trouble worn?  
God the Lord in all delighteth,  
And their goodness he requiteth;  
||: Thee, too, he doth know and love. ||
MORADERATELY FAST.

SPRING WANDERING SONG.

1. Birds are sing-ing, flow-ers bloom-ing, Na-ture smil-ing, ev-ry-
2. Like the bird in cage im-prison'd, Have we been the win-

where; Let us forth with-out de-lay-ing, O'er the
through; Now the cage is o-pen'd for us, Win-

pleas-ant mead-ows stray-ing, Thro' the wood so green and fair.
hange no long-er o'er us, Let us fly, then, forth a-

een.

3 Joy reigns thro' reviving nature, 4 Let us all then freely wander
Round us, with us, where we throng; O'er the hill and verdant plain,
Joy is murm'ring in the bow'rs, Thro' the fields and sunny meadows,
Breathes from o'er the fragrant flowers 'Mid the woods refreshing shadows,
From the nightingale's glad song. Forth into the world again.

FOUR SOUNDS IN EACH PART OF THE MEASURE FOR THE FIRST TIME.

[NOT DIFFICULT.]

When there are four sounds of equal length in each part of the measure in double time, the time-names are Tā zā fā nā, Tā zā fā nā.

17.

\[
\begin{align*}
&\text{T.} \\
&\text{D. \& U. \& D. \& U. \& P.} \\
&\frac{2}{4} \quad \text{Tā zā fā nā Tā zā fā nā Tā fā Tā Tā zā fā nā Tā zā fā nā Tā fā Tā}
\end{align*}
\]

These three exercises should be copied upon the blackboard at first, unless the pupils are well accustomed to using books.

In beating time, the motion should be from the wrist only, and the hand should move very quickly, without making the least noise.

THE DOTTED QUARTER-NOTE IN TWO-FOUR TIME.

18.

\[
\begin{align*}
&\text{T.} \\
&\text{D. \& U. \& D. \& U. \& P.} \\
&\frac{2}{4} \quad \text{Tā fā Tā fā Tā-ā fā Tā fā Tā fā Tā-ā fā}
\end{align*}
\]

It will greatly assist the mind in comprehending the relative value of the dotted quarter-note, to think of it as two beats long. Both the down- and up-beats are perfectly performed, and the hand is at rest after making the up-beat, before the eighth-note which follows is sung.

THE DOTTED EIGHTH-NOTE.—[NOT DIFFICULT.]

19.

\[
\begin{align*}
&\text{T.} \\
&\text{D. \& U. \& D. \& U. \& P.} \\
&\frac{2}{4} \quad \text{Tā zā fā nā Tā zā fā nā Tā-ū-ū nā Tā-ū-ū nā}
\end{align*}
\]

&\frac{2}{4} \quad \text{Tā zā fā nā Tā zā fā nā Tā-ū-ū nā Tā-ū-ū nā}
\end{align*}
\]

The above exercises should be done with spirit, both as to beating time and uttering the time-names. Right practice only, will secure a clear understanding of the dotted eighth-note. It may be well to repeat each of the above exercises four times.
PRAISE OF SINGING.

ALLGRON.

1. Children all with cheerfulness Let your songs be ringing!
   Music all your lives will bless, Therefore still be singing!

   Singing smooths the rugged way Thro' this vale of sorrow;

   Singing cheers the darkest day, Brings the bright-est morrow.

2. When good humor flies away,
   Then come care and sadness;
   Quickly sing a cheerful lay,—
   All will soon be gladness;
   Music cheers the darkest hours,
   Peace and comfort bringing;
   What the dew is to the flow'rs,
   To the soul is singing.

3. Sing the larks in yonder sky,
   Sing the birds at even,
   Swallows from the house-top cry,—
   All give thanks to Heaven.
   Forest, field, and meadow too,
   With their songs are ringing;
   Wherefore, children, should not you
   Evermore be singing?
THE SILV'RY MOON ADVANCES.

1. The sil-v'ry moon advances, O'er lofty hill and tree,
   2. She comes, so softly stealing, Across the stillly night;

Who, 'mid the starry dances, So beautiful as she?
How many hearts are hail-ing, Her mild and friendly light!

3 Our eyes she gently closes,
   When daily toil is o'er;
   The weary earth reposes
   Beneath her soothing power.

4 She comes with night-dews, healing
   The soul with pain distress'd;
   She wakes the sweetest feeling
   Within the lonely breast.

5 Our heavenly Father lends us
   This trusty friend by night;
   May he a spirit send us,
   As pure as her pure light.

\textbf{The Eventide.}

1. Oh! lay your weary work aside Oh! put your cares away;
2. How sweet when work is laid aside, And closed the doors of school,

It is the pleasant evening, The merry time of play.

Among the spreading trees to hide, That shade the limpid pool;

And hark! the shouting on the green, And by the paling grey,
Let joy, then light up ev'ry face, Come all, with glad array,

Where many a merry face is seen, As gently falls the day.
And let us run a merry race, As gently falls the day.

[3rd stanza at foot of opposite page.]
Oh, wake and let your songs resound, And let your songs resound,
For sacred freedom here is found, For freedom here is found.

TRUTH AND HONESTY.

From the German, by Mrs. Shindler. W. A. Mozart.

1. Let precious truth and honesty Attend thee all thy days,
2. Then, as on pastures fair and green Thro’ life thy feet shall roam,

And turn not thou a finger’s breadth From God’s most holy ways.
Nor fear nor terror shalt thou feel, When death shall call thee home.

3 The wicked man in all he does Is ever sore distressed;
   His vices drive him to and fro;
   His soul can find no rest.

4 The joyous Spring, the waving trees, For him smile all in vain;
   His soul is bent on lies and fraud,
   And on ill-gotten gain.

5 To him the leaf by breezes stirred Has terror in its sound;
   And when he’s buried in the grave, His soul no rest has found.

6 Then practise truth and honesty Through all thine earthly days,
   And turn not thou a finger’s breadth From God’s most holy ways.

[Concluded from opposite page.]

3 Oh! pleasant is the merry ring, But fainter, fainter grows the sound,
The race o’er hill and dale, Less jocund is the play, [round
And lightsome are the hearts that sing, For twilight shades are gathering
When ev’ning sports prevail. As gently falls the day.
KEY OF D.

[Chart No. 27 is placed before the class. Questions to be answered from the diagram.]

What is the pitch of one in this key?
What is the pitch of three? Of seven?
Which sound of the scale comes with the g-clef?
What new chromatic sound in this key?
Why is c-sharp or cis used in this key?
Why is f-sharp or fis used in this key?

[The teacher will lead the class to know how to get the pitch d from the pitch-pipe, (either from c or g), and have the pupils sing the middle scale by the scale-names, syllables, and pitch-names; then the upper and lower scales. The teacher may write, in figures, some well known tune upon the blackboard, as follows, and have the scholars sing it.]

1.

D\textsuperscript{4} 3–3, 2, 3, 5, 5–3–3, 2, 1–0–: 8–8, 6, 8, 6, 5, 5–

The diagram appears upon the staff thus:—

2.

[The teacher will explain the key signature, write it upon the blackboard, and have the pupils copy it; thus:

It should not be any longer necessary to write the parts separately for the convenience of study. In all two-part songs, let the second or lower part be learned first, by all the class; then the first or upper part. All the songs should be learned by note, both as to time and tune; just as if there were no words to the music.]
MORNING PRAYER.

1. To Thee, Father, Cheeryful thanks I pay;
2. Sweetest slumber, Night has given me;

Thou hast brought me To another day.
Sleep refreshing, Makes me strong to be.

3 This day, dawning, Bringeth new delight
Let me, Father, Spend it, then, aright.

4 Heavenly Father, Oh! thy blessing give;
That obedient I may ever live!

Exercises Nos. 2 and 3, upon Chart 27, are not so difficult in the time as they appear to be. This is a good opportunity for mastering the dotted eighth followed by a sixteenth, in four-four time, as in the second measure of No. 2. 5 Again to plant it in shelter there;
   \[\|:\text{ And still it blossoms, that flow'rt fair. }\|:\]
1. Lovely moon, that softly glides
   Through the realms where God abides;
   Through the realms of upper sky,
   In the arched heav'ns on high;—

2. In the gloomy night, thy ray
   Lights the pilgrim on his way:
   When the shades of darkness come,
   Thou dost guide him to his home.

3. Bright thy smile when cares annoy,
   Token of that heav'nly joy
   That shall reign in realms above,
   Breaking forth in songs of love.

THE CALL TO PRAYER.

Behold how brightly morning awakes each bird and flow'r, The

KEY OF A.

The pupils will observe by looking at the diagram, that in the lower scale there are three chromatic sounds, and that the new one, g-sharp or gis, comes upon the seventh degree of the scale.

Instead of writing the g-sharp on the second line, after the f-sharp and e-sharp, thus:

It is written upon the first space above the staff, thus:

FLAT-SEVEN IN THE KEY OF A.

SHARP-FOUR IN THE KEY OF A.

INDEPENDENCE-DAY.

1. This day to greet, With joy we meet; Then ban-ish care a-
2. Our fa-thers brave, The land to save, Did free-dom's call o-

way! With fes-tive cheer, Come, has-ten here; 'Tis bey! By young and old Their deeds be told; 'Tis

In-de-pen-dence-Day, 'Tis In-de-pen-dence-Day!
COME AND SEE HOW HAPPILY.

1. Come and see how happily We spend the day,
   Always joining cheerfully In school or play;
   In our books and sports combined, Many are the joys we find.

2. We improve the present hour,
   But with study and with song,
   For swift it flies;
   Time with us still glides along.
   Youth is but a passing flow'r,
   Come and see how happily
   Which blooms and dies;
   We spend the day, etc.

CHILDHOOD.

1. O time of simple pleasures! I never can forget
   Those happy hours of childhood, Like peaceful jewels set;
   I sleep without a sorrow, And wake with early morn,
   To watch the sunny morrow Rise thro' the rosy dawn.

2. No cares or griefs distress me,
   I strive to please my teachers
   The future is all bright;
   By diligence and love,
   In parents, brothers, sisters,
   And day by day endeavor
   I constantly delight;
   My gratitude to prove.
FRIENDSHIP.

1. A - wake, a - wake the tune - ful voice, And strike the joy - ful
strings; We'll pour the mel - low notes a - long, And flame: But 'tis the song that glows like fire, The
raise a peal-ing, gladd'n-ing song, Till heav'n with mu - sic rings, song that feel-ing hearts in - spire,—A mu - sic worth the name.

3 But hark! those sweet, concordant notes,
    That breathe a magic spell,
    That seem like songs the angels sing,
    Like sounds which have in heav'n their spring,
    Where holy beings dwell,—

4 'T is these that glow from Friendship's soul;
   'T is these that speak the heart:
   'T is these that show the peaceful mind,
The spirit meek and pure and kind,
   Unstained by vicious art.

5 Oh, yes! 't is here that music dwells,
    In Friendship's sweet abode;
   'T is here that notes concordant sound,
    'T is here that harmony is found
    Like that which dwells with God.
CHANGE OF SEASONS.

From the German, by Mrs. S. B. Dana Shindler.

1. How pleasant the change of the seasons, As onward for ev'ry they roll!)
   What pleasure, what joy never-ending They bring to the care-wearied soul!)

   The Spring with its warmth and its rapture Awakens all nature again,

   Gives life to the trees and the rivers, The seeds and the meadows and plain.

2. The long shining day of the Summer 3 Then Winter comes, silently pouring
   Do ripen the birth of Spring, Her white, fleecy snow on the ground;
   And when we are weary, complaining, Tho' cold and tho' stormy, what pleasure
   Do soft cooling fruits to us bring; In skating and sleighing is found!
   And then comes the wonderful blessing So love we the change of the seasons.
   Which Autumn so richly doth yield, As onward for ev'ry they roll;
   When ripens the grass in the meadow, For pleasure and joy never-ending.
   And ripens the grain in the field. They bring to the care-wearied soul.
WISDOM OF YOUTH.

From the French.\[ From the French.\]

F. LAUTERBURG.

1. Wayward child, reflecting never, Pause to
   For the days pass onward ever, And no
   profit by the light; Ev'ry step wher'er
   pow'r can check their flight.

2. Moments flee, and all things teach us
   That the past comes ne'er again;
   All too soon the time must reach us,
   When regrets shall be in vain.
   Let not glowing youth's fair treasures
   Fade in indolence away;
   Know that life's enduring pleasures
   Grow from action, day by day.

3. Oh, remember thy Creator,
   While thy life's without a care;
   So his grace shall guide thee later,
   Saving thee from sin and snares;
   When thy head by age is whitened,
   Warning thee that death is near,
   All thy life by God's love brightened,
   Thou shalt go without a fear.

Key of E.

[The pupils should be directed to give their attention to the diagram on Chart 31 (or that on this page), and examined as to the pitch-names. They will observe that the new chromatic sound in the formation of the scale in this key is d-sharp (or, in singing, dis), and that it comes on the seventh degree. There will be no difficulty in going directly to the practice of the following exercises and songs. They should also be required to beat the time in these and all exercises, and care should be taken that this be done with precision and quietness. Beating time is of no avail unless well done. If the beating be sluggish, the singing will be of the same quality.

We have now had the scale and songs in five different keys, but have said nothing about the relation of one key to another. There are four more keys to be learned, making in all nine. The study of Modulation from one key to another is given its natural place in the Third Series of Charts and Third Reader, where it is presented from a harmonic point of view, in accordance with the best authorities.]

THE JOYS OF INNOCENCE.

1. Joy is round us, smiling ev'ry where!
2. Love is ruling, working ev'ry where,

On the hills and rivers smiling, Ev'ry human care beguiling; Joy is round us, smiling ev'ry where. decked with flowers; Love is ruling, working ev'ry where.

3 Pleasure echoes, echoes far and near,
   From the green banks decked with flowers,
   Sunny hills and pleasant bowers;
   Pleasure echoes, echoes far and near.

4 Maiden, up, and weave a flow'ry crown:
   See the buds their leaves unfolding;
   Love her festival is holding:
   Maiden, up, and weave a flow'ry crown.

5 Go ye forth and join the May-day throng;
   Sings the cuckoo by the river;
   In the breeze the young leaves quiver;
   Go ye forth and join the May-day throng.
THE NEW SECOND

PEACE.

1. Gentle Peace, from heav'n descend-ed, We would live beneath thy law; Thou hast home and life befriended, Nurse of nobler deeds than war.
2. Thou hast thrown a smile of beauty O'er the meadow, hill, and grove; Thou hast quickened us to duty, Thou hast warmed our hearts to love.

3 Ours is now each smiling flower, Ours the lofty mountain-pine, Ours the fruit-tree's golden shower, And the close-entwining vine.

4 Still stay with us, still replenish Fields with fruit, ourselves with love; Discord and dissension banish, Peaceful Spirit from above.

CHILDHOOD PLEASURES.

ALLEGRO.

1. { Come, let us, singing, speak out those pleasures; We prize them highly, above all treasures;
Which crown our childhood, those days so dear; 
How bright their sunshine, how sweet, how clear! 

Our days are May-days, without a cloud, Then let us,
singing, rejoice aloud. Our childhood pleasures are like the

rivers, Whose onward flowing is deep and free.

2 Oh, how we’re favored, to live so cheerful, 
So free from sorrow and free from care, 
While many round us are sad and tearful, 
For sad misfortune does not them spare; 
Then we’ll be happy while yet we can, 
While days of childhood shall yet remain. 
Our childhood, etc.

3 Yes, we will ever, by night and daily, 
Sing forth our pleasures in full good cheer; 
We’re yet in childhood, and all goes gaily; 
Our age of sadness is not yet near; 
Then let our voices resound aloud; 
For all is sunshine,—there’s not a cloud. 
Our childhood, etc.
HOW LOVELY, HOW CHARMING.

1. How lovely, how charming, has nature been made! The
   hill in the sunshine, the walk in the shade, The
   wild rose, adorning the hedge with its bloom, And
   loading the air with its wealth of perfume!

2. How green are the meadows! how bright is the morn! How
   glitter the dew-drops on laurel and thorn! How
   pearl-yard pure is the briar in bloom! How
   lovely the May-flow'rs, how sweet their perfume!

3 The aspen-tree flutters, and whispers its fear;
The linden invites all the bees to draw near;
The willow bends low its frail branches to lave
In the lake, where the clouds seem to float on the wave.

4 How lovely, how cheering, has nature been made!
The flow'rs in the sunshine, the brook in the shade,—
All, all with their charms, were bestowed with our birth,
To cheer and enliven our pathway on earth.
THE WANDERER'S RETURN.

When, my father's home forsaking, Far o'er
sea and land to wander,—When, each tie that bound me

Proud of freedom, gay I roamed,—Sweetly

smiled the world before me, Sweetly smiled the heav'n

3 When my footsteps, homeward turning,
Sought once more the household altar,—
When my heart, impatient burning,
Long'd the dear ones there to greet,—
Then how smiled dear home before me!
Then sweet memory flutter'd o'er me,
Then sweet hope's light pinions bore me,
Peace and joy at home to meet.
KEY OF F.

It will be observed that each new key; starting from the key of C, has been founded upon Five of the key before it: G was Five in the key of C; D was Five in the key of G; A was Five in the key of D; and E was Five the key of A.

In the keys with flats, starting from C, each new key is founded upon Four of the preceding key; thus, F is Four in the key of C, and the same relation will be observed in the succeeding keys with additional flats.

In this key, as may be seen by the diagram, it becomes necessary to use the chromatic sound b-flat (or, in singing, bes) to make the semitone come right between three and four of the scale.

The diagram appears on the staff, thus:

1.

As b-flat (or bes) is the only chromatic sound in this key, its sign is placed on the third line of the staff as in the following exercises.

2.

3.

4.
You will remember that on Chart 29, Ex. 4, flat-seven was produced by the use of a natural, (♯). In this key, sharp-four, is produced by means of a natural, as in the following example.
THE NEW SECOND

SOWING FLOWERS.

1. Lit-tle seed, now must thou go To thy still, cold bed be-low;
2. Couldst thou know what 'tis I do, And couldst tell thy sor-rows, too,

Do as thou art bid-den! Now the earth must cov-er thee,
This were thy com-plain-ing: "Ne'er shall I the sun be-hold,

And no eye shall ev-er see Where thou li-est hid-den.
In this grave, so dark and cold! Ah, my life is wan-ing!"

3 But take courage, little seed;
   Though thou liest here, indeed,
   Gentle slumber taking,
   Yet thou 'lt soon in upper air
   As a flower bloom so fair,
   To new life awaking!

4 I shall one day lie as thou
   In thy dark bed liest now,
   When death shall befall me;
   But in glory shall I rise
   To the realms above the skies,
   When the Lord doth call me.

COMMENCING AFTER THE UP-BEAT.

NEVER SAY FAIL.

MODERATO.

1. Press on-ward—'tis bet-ter Than sit-ting a-side,
2. With eye that is o-pen, A tongue that's not dumb,

And dream-ing and sigh-ing, And wait-ing the tide;
And heart that will nev-er, To sor-row suc-cumb,

In life's ear-nest bat-tle, They on-ly pre-vail,
We'll bat-tle and con-quer, Tho' thou-sands as-sail

Who dai-ly march on-ward, And nev-er say fail.
How strong and how might-y, Who nev-er say fail.

3 Then on-ward, right on-ward,
And press on your way,
Unheeding the envious
Who would you betray;
All ob-sta-cles van-ish,
All en-e-mies quail,
In fear of their wis-dom
Who nev-er say fail.

4 In life's rosy morn-ing,
In man-hood's firm pride,
Let this be the mot-to
Our foot-steps to guide;
In storm and in sun-shine,
What-ev-er as-sail,
We'll on-ward and con-qu'er,
And never say fail.

3 O come then to the woods! The verdant, verdant woods!
The echo that dwells by the mountain, Where sweetly the birds are all singing.
Will answer your voice by the fountain And thanks for the morning are ringing,
That springs in the verdant woods, Around in the verdant woods.
The verdant, verdant woods.

KEY OF B-FLAT.

It will be seen by the diagram that the new chromatic sound in the formation of the scale in this key, is c-flat (or, in singing, es), and comes on the fourth degree.

The diagram appears on the staff, thus:

1.

SHARP-ONE AND SHARP-SIX.

PROVIDENCE.

1. He who made the stars on high
   Rules supreme o'er earth and sky;

2. He who marks the sparrow's fall
   Looks with tender-ness on all;

Here we all our homage bring,
And grateful praises sing,
Him we trust our souls to keep;
His mercy cannot sleep.

3. Though our life is but a span,
   Endless is the soul of man,
   May we all, then, look above,
   And trust a God of love.

SHARP-FIVE.
FIRST DAYS OF SPRING.

From the French. J. Greith.

ALLEGRETTO.

1. The fields are now blooming with flowers; How charming and lovely the sight! The sun and the soft April hand of the Lord; The tuneful birds praises all show-ers Bring smiling May's children to light, Bring render To him who creates by his word, To smiling May's children to light. him who creates by his word.

2. Each leaf-let and bud, green and tender, Proclaims the good news, bring gladness to all men. The warm sun's rays, they make the flowers bloom. The birds sing sweetly in the branches of the trees. The joyous spring returns, bringing beauty and life. 

3 The apple-tree buds, faintly blushing, Perfume the clear air all around; The long-prisoned brook, gladly rushing, Leaps onward with musical sound.

4 All Nature lifts myriad voices, That sound the whole forest along; The bird and the flower rejoices,— Come, join we the jubilant throng!
TRAVELLING.

1. To wander is the miller's joy! What kind of miller
can he be, Who ne'er hath learned to wander free, To wander,

2. From water we have learned it;—yes, It knows no rest by
night or day, But wanderers ever on its way, Does wander
on its way. Tra la la, etc.

wan-der free? Tra la la, Tra la la, Tra la la la
la la, Tra la la Tra la la, Tra la la la la.

3 We see it in the mill-wheels, too:
They ne'er repose, and ne'er delay,
They weary not the live-long day,
The mill-wheels all the day. Tra la la, etc.

4 The stones, too, heavy though they be,
Round in the giddy circle dance,
E'en fain more quickly would advance,
The stones, too, would advance. Tra la la, etc.

5 To wander, then, is my delight:
Oh, master, help me on my way,
Let me in peace depart today,
To wander, wander free. Tra la la, etc.
LO! THE BLITHESOME LARK.

1. Lo! the blithesome lark is soaring Far a-loft in morning skies;
2. Ev'ry mountain altar blazes; Incense sweet to heav'n ascend;

Songs of grateful gladness pouring, Higher, higher, see him rise! Thousand
Meadows waft their silent praises; Ev'ry flower adoring bends. Man, a-

warp-lers now are springing, Up to meet the welcome morn;
wake from heav'y slum-bers; Morning breaks serenely bright;

Sky and grove with joy are ring-ing; Hark the wild, en-trance horn.
Songs of praise, in tuneful num-bers, Raise to Him who rules the night.

THE SHOWER.

1. See! the rain is fall-ing On the mountain's side;
2. See! the cool-ing shower Comes at God's com-mand,

See the clouds bestow-ing Blessings far and wide!
Bright-ens ev'ry flower, Cools the heat-ed land.
KEY OF E-FLAT.

The pupils will observe that the new chromatic sound used in the formation of this key is a-flat (or, in singing, aes).

This diagram appears upon the staff, thus:

1.

The following exercise in three-four time, including the dotted quarter-note followed by an eighth note, as in the second measure, is repeated here, because it is one of the most difficult forms of measure to be met with, that appears so easy. The universal tendency is to sing the third note too soon.

THE BELL.

1. Bell, thy tone is cheerful, When the bridal party
   To the church moves by; Bell, thy tone is holy,

2. Bell, thy tone is peaceful, When it bids us gather
   For the evening pray'r; Bell, thy tone is mournful,

   When on Sabbath morning Fields deserted lie.
   Tolling for the loved ones Who departed are.

3 Say, how canst thou mourn so? How canst thou rejoice, too,
   Lifeless as thou art?
   All our joys and sorrows
   Graciously thou sharest,

   Speaking to the heart!

4 God has wondrous power,
   That we understand not,
   Given thee, sweet bell!
   When the heart is failing,

   Thou dost give it comfort,
   Soothing like a spell.

GERMAN CHORAL IN THE KEY OF E-FLAT.
THE FOUNTAIN.

1. Bubbling Spring so bright and clear, Pleasant is thy voice to hear;
2. Oft at noon-day's sultry heat, We have sought thy cool retreat;

Listen to the song we raise, For we sing it to thy praise.
And beside the shady pool Sipp'd the water clear and cool.

3 On thy margin's grassy mound
   Are the earliest violets found;
   And our wreath-crown'd heads we view,
   Pictured in thy mirror true.

4 Thou dost never idly stay
   Ling'ring on thy chosen way;
   All, like thee, are onward driven,
   Nought is firmly fix'd but heaven.

THE WILD BIRD'S SONG.

C. M. Von Weber.

GENTLY, SLOWLY.

1. I ride upon the green tree tops
2. I sing I sing of my Maker's high. When parch'd is the earth and the brooklets are love. The wanderer stops near my sheltering dry; I sing I sing in my covert grove; He hears the song in the quiet cool. And love my breast in the calm shady pool. air, And listens and smiles, and forgets all his care.

3 At night to my sheltering pine I fly,
   And sleep till the day-dawn gilds the sky;
Then loud I sing from a swelling breast,
In praise of the God who protects my nest.
THE GOOD NEIGHBOR.  

Old German.

1. Dear neighbor, pray lend me your lantern tonight;
2. Yes, neighbor, I'll lend you my lantern tonight;

The sky is so dark, and the stars give no light;
It storms, it is dark, and the moon gives no light;

My shepherd has lost my best lambs by the way,
And tho' it be broken, no fault will I find,

And I must go with him and find where they stray.
For fast it is raining, and cold is the wind!

3 Good neighbor, should trouble your path e'er betide,
Then pray call upon me, and be not afraid;
The few transient sorrows that press us today,
By helping each other, will soon pass away.

WILD-WOOD FLOWERS.

Dr. Lowell Mason.

1. Flowers, wild-wood flowers, In a shelter'd dell they grew;

Flowers, wild-wood flowers, In a shelter'd dell they grew;
I hurried along, and I chanced to spy This small star-flower with its silvery eye; Then this blue daisy peep'd up its head, Sweetly this purple orchis spread. We gather'd them all for you, We gather'd them all for you; All these wild-wood flowers, Sweet wild-wood flowers, All these wild-wood flowers, Sweet wild-wood flowers.

2 |: Flowers, lovely flowers,
   In the garden we may see. ||
The rose is there with her ruby lip,
   With pinks,—the honey we love to sip,
Tulips, gay as a butterfly's wing,
Marigolds rich as the crown of a king,

As these wild-wood flowers, etc,

8. PREPARATORY TO "ARRIVAL OF SPRING."

SLOWLY.

ARRIVAL OF SPRING.

LIVELY.

1. The Spring, the merry Spring is come; Who would her beauties see,
2. Concealed amid the forest deep All Winter hath she lain;

Oh, let him quickly forth to roam, The meadow-flow'rs to see!
A bird hath roused her from her sleep, And now she's here again.

3 The Spring returns again to cheer
   With joy and merry song;
   Where'er her beauteous charms appear,
   Delights around her throng.

4 Then forth into the meadows green,
   And let us freely roam;
   When first the coming Spring is seen,
   Oh, who would stay at home?

9.
SWEET SPRING.

1. Sweet Spring is returning; She breathes on the plain,
   And meadows are blooming In beauty again.
   Ah, long have we waited By thee to be blest;

2. Full gladly I greet thee, Thou loveliest guest!
   Now fair is the flower And green is the grove,
   Stern Winter threw o'er us His heavy, cold chain;

3 And then, O thou kind one,
   Thou camest so mild,
   And mountain and meadow
   And rivulet smiled;
   The voice of thy music
   Was heard in the grove;
   The balm of thy breezes
   Invited to rove.

4 Now welcome, thou loved one,
   Again and again,
   And bring us full many
   Bright days in thy train;
   And bid the soft Summer
   Not linger so long,
   And bid the soft Summer
   Not linger so long.
ARISE, ARISE.

Dr. J. Mainzer.

PART III.—MISCELLANEOUS PIECES.

GRANDMOTHER'S ADVICE.

From the French. —
SLOWLY AND QUIETLY.

1. Maid'ens, if you'd have me praise you, Do your work with nim-ble
2. Dal-ly not, nor waste the mo-ments, Steps grow man-y, feet grow

fin- gers; Deft-ly ply your glis-ting nee-dle;
lon-ger; Stock-ing's more and more are need-ed;

Time for i-dlers nev-er lin-gers.
Nim-bly knit them strong and strong-er.

3 Seek a method in your life-work,
   Ev'ry fit occasion seizing;
   Count each word and step, like knitting,
   Then shall speech and work be pleasing.

4 Mend the rents while they are little,
   Ere they grow bey-ond your power:
   Cure your faults of tongue and temper,
   Ere they pass youth's tender hour.
LOVE OF TRUTH.

1. My days of youth, tho' not from folly free, I
   prize the truth, the more the world I see; I'll
   keep the straight and narrow path, And, lead where'er it
   may, The voice of truth I'll follow and obey.

2. My footsteps lead, O Truth, and mould my will, In
   word and deed my duty to fulfill; Dis-
   hon-est acts, and selfish aims To truth can ne'er be
   long; No deed of mine, shall be a deed of wrong.

3 The strength of youth, we soon see it decay,
   But strong is truth, and stronger ev'ry day,
   Though falsehood seem a mighty pow'r
   Which we in vain assail,
   The power of truth will in the end prevail.

4 My days of youth, tho' not from folly free,
   I prize the truth, the more the world I see;
   I'll keep the straight and narrow path,
   And, lead where'er it may,
   The voice of truth I'll follow and obey.
COLD THE BLAST MAY BLOW.

1. Cold the blast may blow, 
   Heap-ing high the snow;

2. Bosoms firm and bold 
   Fear not wind nor cold,

Winds may loud-ly roar, 
   Winds may loud-ly roar;

Fear not ice nor snow, 
   Fear not ice nor snow;

loud-ly roar; Trees, all brown and bare,
   Sad may wave in ice nor snow; Fierce-ly thro' the gale

Drift the snow and air, Deck'd with leaves no more, Deck'd with leaves no more.

hail; Hearts may warm-ly glow, Hearts may warm-ly glow.

3 When in school we meet,
   Looks of welcome greet,
   Sent ||: from smiling eyes; ||
   When our teachers dear
   Give us words of cheer,
   ||: What are wintry skies! ||

4 Come, then, rain or hail,—
   Come, then, storm or gale,—
   Glad ||: to school we'll go; ||
   Bosoms firm and bold
   Shrink not from the cold,—
   ||: Fear not ice nor snow. ||
MORNING DEVOTION.

1. How sweet from gloomy darkness
   The blushing morn awakes!
   How rich the early music
   From the forest breaks!

2. While in the early sunshine
   The silver dew-drops gleam,
   And ev'ry thing rejoices
   Sure nature, all so lovely,

3. My Father, give me power
   To consecrate to thee
   My life, and every blessing
   That is conferred on me;

   It's Maker's goodness feels,
   Which floats in glowing,
   Awake, my soul, and pay
   To God thy grateful worship,

   With warm devotion
   Its Maker's goodness feels,
   Which floats in glowing,
   Awake, my soul, and pay

   To God thy grateful worship,
   Who made the lovely day.

   To God thy grateful worship,
   Who made the lovely day.

   To God thy grateful worship,
   Who made the lovely day.

   To God thy grateful worship,
   Who made the lovely day.

   To God thy grateful worship,
   Who made the lovely day.
WHEN THE DAY WITH ROSY LIGHT.

1. When the day with ro-sy light, In the morn-ing glad ap-pears,
2. Oh! 'tis sweet at ear-ly day Then to climb the moun-tain-side,

And the dusk-y shades of night Melt a-way in dew-y tears,
Where the mer-ry song-ster's lay Sweet-ly ech ces-far and wide:

Up the sun-ny hills I roan; Bid good-mor-row to the flow'rs.
Noon may have its sun-ny glare; Eve, its twi-light and its dew;

Wak-en, in their high-land home, The minstrels of the bow'rs.
Night, its soft and cool-ing air;—But give me morn-ing blue.

THE FARMER'S BOY.

BRISKLY, WITH STEADINESS.

1. The Sun had sunk behind the hills Across you dreary moor,
2. My father's dead, my mother's left With four poor children small,

When wet and cold there came a boy, Up to the farmer's door:
And what is worse for mother still, I'm eldest of them all.

Can you tell me, said he, If any there be Who would
But, tho' young, I will work As hard as I can, If I

like to give employ, For to plough and to sow, For to
Once can get employ, For to plough, etc.

reap and to mow, For to be a farmer's boy,

For to be a farmer's boy.

3 But if no boy you chance to wait, And at break of the day I'll trudge
One favor I would ask,— far away,
To shelter me till dawn of day, And will elsewhere seek employ,
From the cold and wintry blast, For to plough, etc.

[Concluding stanzas on opposite page.]
IN THE COTTAGE WHERE WE DWELL.

1. In the cottage where we dwell, We have led a peaceful life;
2. Blest with life and blest with health, We desire no richer home;
3. All the sweets of wealth will pall: Honest hearts and liberty,

Ours are joys which none can tell, Who engage in anxious strife;
Nor to be the slaves of wealth, Do we ever wish to roam;
In our cot are with them all, Home is home where e'er it be.

(1-3). Tho' but lowly be our state Yet contented with our lot

We envy not the proud and great, Happy in our humble lot.

[Concluded from opposite page.]

4 The Farmer's wife cries, Try the lad, Let him no further seek,
Oh, do, papa! the daughter cries, While tears run down her cheek;
For those that will work, 'tis hard they should want,
Or should wander for employ.
For to plough and to sow,
For to reap and to mow,
For to be, etc.

5 The farmer's boy, he grew a man; The good old farmer died:
He left the lad with all he had,
And his daughter for his bride.
The boy that was, now a farmer is, And he thinks, and smiles with joy,
On the break of the day, When he passed that way.
For to be, etc.

THE NATURAL.

(Teachers will excuse this repetition.)

Besides the sharp (♯) and the flat (♭) which we have used, there is another character, called the natural, made thus: ♮. The natural is used to take away the effect of a sharp or flat; for example:

1 a. 1 b.

\[

THE HERDSMAN'S HAPPY HOME.

Poetry, Old English.  

Franz Schubert.

1. What pleasures have great princes More dainty to their choice
Than herdsmen wild who care-less, In quiet life rejoice,

In quiet life rejoice?

2 All day their flocks each tendeth,  
   All night they take their rest,
More quiet, than who sendeth,

||: His ship into the East. :||

3 Oh! happy who thus liveth,  
   Not caring much for gold,
With clothing which sufficeth

||: To keep him from the cold.:||

EARLY SPRING DAYS.

Franz Abt.

1. Each whisper of the willow, Each murmur of the pine,

2. Now through the sparkling waters The fishes glide along,

Each ripple of the billow, In joyful concert join.

And thro' the woodland echoes The bluebird's cheerful song.

3 The happy birds, with singing,  
   The grove and forest cheer,
From hill to dale repeating,  
   The welcome Spring is here.

4 Each living thing rejoices  
   In Him who made the Spring,  
We'll shout with swelling voices;  
   And cheerful praises sing.

THE RAMBLE.

J. A. FEKERER.

LIGHTLY, NOT TOO FAST.

1. I've been sitting by the hill-side, Little birds flew gaily.
2. I've been standing in the garden, Where the buzzing bees flew round; What a singing, What a springing From the round; What a humming, Going, coming, As their nestlings to the ground! La, la, la, la, la, la, la, honey cells they found! La, la, la, la, la, la, la.

3 I've been walking in the meadow: Little swallows skimmed the brook; What a dipping, what a dripping — Oh, how droll it made them look! La, la, la, etc.

4 Cheerful comrades soon will join us, With the sun's last parting ray; Then with singing, voices ringing, We will close this happy day. La, la, la, etc.

SONG OF THE WOODS.

German Air.

1. Oh, could I in the greenwood be Thro' all the Summer-time,
2. The branches beck-on me to stay Be-neath their shady dome,

What pleasure would they give to me, Those trees in all their prime! 
The meadow-flowers nod and say, "Come, gentle stranger come!"

3 The birds, awaken'd from their sleep, 
   Are soaring high and free; 
The deer and roe with dancing step 
   Are springing merrily.

4 Young birds from ev'ry twig and bough, 
   Enchanted with their home, 
Are singing loud and singing low, 
   "Come, seek the greenwood, come!"

CEASE SWEET CONTENT TO SLANDER.

From "Guy Mannering." Fr. Schubert.*

SLOWLY.

1. Cease sweet Content to slan-der! More con-stant than the
dove, She ne'er was given to wan-der From home-born peace and love; Oh,
dell; 'T is neath its peace-ful shel-ter She most is wont to dwell; She

'tis not in the pal-ace That joys like her's a-
loves to soft en sor-row, To drive each care a-

bound; 'T is not midst-wealth and glo-ry And fame that she is
way, And o'er the hour of dark-ness, To shed a cheering

found, And fame that she is found.
ray, To shed a cheer-ing ray.

*Franz Schubert, when a boy of eleven, lived in Vienna at the time Beethoven was in his prime. He began to write music, both vocal and instrumental, when very young. In all his compositions there are difficult places, more so than at first appears. In this song, the chief difficulty is in the time—particularly in the measures containing triplets, which will require special attention. The difficulties in both time and tune will be best overcome by first studying well the exercises 2 a and 2 b, on page 118, carefully beating the time and using the time-names.
1. The heav-ens are smil-ing so soft and so blue, The hills and the
mead-ows all glit-ter with dew, The trees wave their blossoms, so
fra-grant and fair, And sweet warbling songsters are fill-ing the air.

2 We'll off to the woods and leave sorrow at home;
We'll climb the green hills, for 't is pleasure to roam.
Oh! who in the city would stay the year round,
When pleasures like these are so easily found?

3 But ah, the sweet flowers but bloom for a day!
See! many have fallen and sprinkled our way:
They fall in light showers, if branches but wave,
And strew the lone violet's balmiest grave.

4 So all things must feel the cold finger of death!
The strongest must fall, and must yield up their breath;
The fate of the monarch is seen in the rose,
And ours is the slenderest blossom that grows.

5 But death has no terrors to those who do right:
To them he appears like an angel of light,
And smilingly beckons their spirits away
To realms of unending, unspeakable day.
1. From hills with snow-peaks heav'nward tending, Lit up by ro-sy
dawn, Lit up by ro-sy dawn, Ha-li ha-li

ha-li ha-li ho! My song of praise is now as-
ha-li ha-li ho! I am not anx-ious for the
cending. To greet the com-ing morn, To greet the com-ing

TO THE LARK. Dr. J. Mainzer.

1. Pretty lark, thy cheerful lay Welcomes in the dawning day; Nature's morning hymn is heard First from thee, delightful bird, First from thee, delightful bird.

2 Thou art mounting to the sky While thy notes are heard on high, And, so rapid is thy flight, Thou wilt soon be out of sight.:]

3 As thou mountest to the skies, May I in true virtue rise, Seeking Wisdom's perfect ways, To direct my future days.:]

HARVEST'S REWARD.

From the French. L. Kurz.

1. Already fields and plains are glowing, Bright in the sun;

The wind is o'er the cornfield blowing, Hay-time is begun.

2 The farmer, joyful with his neighbor, Sees that his field Will in return for honest labor Golden fruitage yield.

3 So he whose earnest hands, unceasing, Work with a will, Shall see his sure reward increasing, And life's garners fill.
WANDERING SONG.

1. The sky is so clear, and all nature so gay,
   Farewell, dearest mother, for I must away!

2. With pack on my back, and with staff in my hand,
   My journey I make to some far stranger land:

3 Beyond the wide plains, on the banks of the Rhine,
   Shall fortune and riches be speedily mine.:

4 One night you'll be sitting all weary and lone,
   And thinking in tears of the wandering one;:

5 A tap at the window, a knock at the door—
   Your son is returned, to depart no more.:

6 "God bless thee, dear mother!" delighted, he cries,
   And empties his treasure before her glad eyes;:

7 "See, see! I have earned, by the work of my hand,
   This gold, dearest mother, for thee to command!":

SONG OF PRAISE.

(May be transposed to the key of B-flat.)

H. G. NEGELI.

1. Oh, praise the Lord! He loves to hear you singing;
2. We're heard afar In God's most holy dwelling,

In sweet accord, Loud let his praise be ringing;
So loud and clear Our voices now are swelling;

Oh, praise the Lord! Oh, praise the Lord!
We're heard afar, We're heard afar.

3 Our voices raise,
   With joy and gladness singing,
   And cheerful praise,
   Oh, let us all be bringing!
   ||: Our voices raise! ||

4 We bless thee, Lord,
   While ev'ry heart rejoices;
   Thy name adored
   We sing with falt'ring voices;
   ||: We bless thee, Lord! ||

5 Then evermore,
   In ev'ry land and nation,
   Tell o'er and o'er
   The story of salvation,
   ||: For evermore. ||

tain!

3 The mountain is the home I love,
Where angry tempests rage above;
When their loud blasts the world appall,
My soul shall rise above them all.
My home is on the moun-tain!

4 And when fierce thunders roll around,
I stand above the crashing sound—
I call aloud and bid them cease:
"Oh, leave my house in tranquil peace,—
My home is on the moun-tain!"

5 And when the storm-clouds first appear,
And lightning flashes through the air,
I wander to the vale below,
So gaily singing as I go.
My home is on the moun-tain!

THE BEE'S LESSON.

(May be transposed to key of B-flat.)

MODERATELY FAST.

1. {Listen to the bee's brisk hum! let us hear what says she:—}

"Little folks, I wonder much that you are so lazy;" Work and action make our lives bright and hopeful ever;
When one effort fails,—why, then make a new endeavor.

2 "Little folks, I wonder much that you will be wrangling;
Joy and peace will flee away, where there's alway jangling,
Our contented little home has no brawler in it,—
If there were one, he would be banished in a minute.

3 "Little folks, I wonder much that you're so unruly,
Caring not for Him who has cared for you so truly.
We obey our lady-queen and with love attend her,
And from harm and injury with our lives defend her."

FALSE PRIDE.

TREVES, 1812.

1. How proud we are, how fond to show
   Our clothes, and call them rich and new,
   When the poor sheep and silk-worm wore
   That very clothing long before, That very clothing long before.

2 The tulip and the butterfly
   Appear in gayer clothes than I;
   Let me be dress'd fine as I will,
   Flies, worms, and flow'rs exceed me still.:

3 Then will I set my heart to find
   Inward adorning of the mind
   Love, knowledge, virtue, truth, and grace,—
   These are the robes of richest dress.:"

THE BLIND BOY.

NATIONAL MUSIC READER.

MODERATO.

OLD GERMAN.

1. It is not that I can-not see
The birds and flow'rs of Spring;
'Tis not that beauty seems to me A dream-y, un-known thing;
It is not that I can-not mark the blue and star-ry sky,
Nor o-cean foam, nor mount ain peak, That e'er I weep and sigh.

2. They tell me that the birds whose notes fall full up-on my ear Are not all beau-ti-ful to sight, Tho' they tell me that the gay-est flow'rs, Which sun-shine ev-er brings, Are not the ones I know so well, But strange and scent-less things.

4 My little brother leads me forth,
To where the violets grow;
His gentle, light, and careful step,
And tiny hand, I know;
My mother's voice is sweet and low,
Like music on my ear;
The very atmosphere seems love,
When they to me are near.

4 My father twines his arms around,
And draws me to his breast,
To kiss his poor, blind, helpless boy;
He says he loves me best.
'Tis then I ponder unknown things,
It may be, weep or sigh,
And think how glorious it must be,
To meet affection's eye!
THE RAIN.
(May be transposed to F.)

ANDANTE.

1. See! o'er yon-der moun-tains Moves the mist-y rain,
2 Rich or poor, what mat-ter? Each is here for good:

Pass-ing, from heav'n's foun-tains, Bless-ings on the plain.
Good seeds let him scat-ter In con-tent-ed mood.

Now's the time for grow-ing; Quick-ly, then, be sow-ing!
For ye share to-geth-er Sun-shine and wet weath-er;

Let the well-till'd field . . . Rich a-bun-dance yield.

SUMMER JOYS.

WM. B. BRADBURY.

Chorus.

1. Joy is warbling in the breezes, Pleasures smile along the fields.

Nature, clad in robes of beauty, All that's sweet and lovely yields.

Duet or Semi-chorus.

Heav'n now sheds its mildest splendor O'er the land and o'er the deep;

Insects feel the common pleasure,—Forth in happy crowds they creep

2 Humming bees and sailing swallows
Gaily tell the lively glee
Nature's now so kindly shedding
Over all the eye can see
"Welcome," says the flock that's feeding
On the verdant, grassy hills;
"Welcome!" echoes many a songster,
Chirping round the rippling rills.

3 Blooming flow'rs, their sweets exhaling,
Join to make the charming scene
Yet still more like happy Eden,
Ere the bight of human sin.
Glad we hail thee, lovely Summer,—
Welcome, truly, is thy smile;
Oh, that all like thee were lovely.
Free from woe and free from guile!
CHANGES.

1. {Yesterday it hail’d and snow’d; All was white on field and road;} Now the snow is all a-way, And the hills are bare and gray.

Oh, this life is ever changing; All our pleasures melt a-way;

Hope alone remains, to promise some future, brighter day.

2. Yesterday my great delight
   Was my rose-tree, fresh and bright;
   Now its faded flowers are shed;
   All may on my roses tread.
   Oh, this life, etc.

OH! THE LOVELY, LOVELY MAY.

1. Oh, the lovely month of May Ever welcome, ever gay!
2. Oh, what verdure clothes the ground! Oh, what fragrance breathes around

When by vale and mountain, When by brook and fountain,
See the willows growing By the streamlet flowing,
Flow'rets bloom and insects play, In the love-ly, love-ly May.
See the grain is wav-ing high, 'Neath the blue and cloud-less sky.

Oh, the love-ly, love-ly May, Ev-er wel-come, ev-er gay!

Charm-ing, charming, charming, charming, charm-ing, love-ly May!

3 Oh, how fresh the morning air!
Oh, how lovely all things are,—
Birds so gaily singing,
Woods and meadows ringing,
Buds and blossoms fresh and bright,
Leaves so green,—enchanting sight!
Oh, the lovely, etc.

4 Hark the universal shout!
Nature's fairest forms are out;
Lambs are playing, skipping,
Bees are buzzing, sipping;
Walk, or ride, or row the boat—
Stand, or fall, or sink, or float,—
Oh, the lovely, etc.

PICNIC SONG.

Briskly.

Join we now in mer-ry song, Voices ringing cheer-i-ly,
While we roam the woods among, Gay and [Omit . . . ] free.
CONTENTMENT IS HAPPINESS,

QUASI ANDANTE.

1. Yes, I am contented, go things as they will,
2. Tho' no brilliant torches on my supper shine,

Dwelling in my cottage, peacefully and still.
Tho' in costly goblets sparkle not the wine,

Many a fool has all things that his eyes behold,
I have what is needful, suffer not from dread;

But to be contented, better is than gold.
Nothing can taste sweet er than my hard-earned bread.

3 Though my name be never heard in foreign land,
   Though no stars nor orders on my bosom stand,
   So my heart be noble, what were all the rest,—
   So my brother's welfare fill my humble breast?

4 I want no proud palace, want no stately hall;
   Brightly on my cottage heaven's sunbeams fall.
   Where content is dwelling, softly lies the head,
   Whether hard or downy be the sleeper's bed.

5 Though no costly marble will adorn my grave,
   Though above my coffin will no banners wave,
   Sacred peace will hover o'er my humble pall,
   And upon my green grave friendly tears will fall.
THE FOUNT OF JOY.

1. Joy, yes, joy's the quick'ning stream, Which the whole earth waters,
   Gladd'ning with its crystal gleam, All her sons and daughters.

   What in valley bloweth, What the hillside showeth,
   Full of joy it gloweth. There are stores of joy to bless,
   And our danger is excess, And our danger is excess.

2. Every one in his own way
   Eagerly pursues it:
   But to seek is oft the way
   Certainly to lose it:
   Happy he that knoweth
   Where the true joy growtheth,
   And the false forsooth.
   Yes, we've stores of joy, etc.
WE KNOW A LAND.

Solo. Moderate.

1. We know a land of beauty's train, Adorned with streams and groves and fields, Where clustering grapes and waving grain The cep-tion knows, A hap-py land, where love and truth Al-ground in rich pro-fu-sion yields. This realm of beauty lay the pain of earth-ly woes. This wor-thy land we so well known Is but the land we call our own. well may own; It is a land we call our own.

3 Solo.—We know a land where moral light Has shed its hallowed influence round: Whose people know the God of might, And love the gospel's gladd'ning sound. Cho.—This sacred land, so lovely shown, We surely may be proud to own.

4 Solo.—We hail thee, Land so pure and great; With welcome honors thee we greet: Oh! may we ev'ry evil hate, That God may here maintain his seat. Cho.—So shall we ever love to own That this great nation is our own.

cold! Children, come, with joy and singing, Where the bright fire burneth, come! And while round your warm hearth springing, Think of those who have no home, Thanking God! thanking God! thanking God!

2. Grateful be! grateful be for your mercies rich and free!
Oh, how many, poor and weary,
Sad and hungry, sick and cold,
Wander through this world so dreary,
Suffering more than can be told!
Grateful be! grateful be! grateful be!

3. Time improve! time improve! learn in youth to look above!
God will bless your pray’rful waiting,
And your pious deeds requite;
Doing good, and evil hating,
Are well pleasing in his sight.
Time improve! time improve! time improve!
COME, MAY, THOU LOVELY LINGERER.

ALLEGRETTO.

1. Come, May, thou lovely lingerer! And deck the groves again,
2. True, winter days have many And many a dear delight:

And let thy silver streamlets Meander thro' the plain.
We frolic in the snow-drifts, and then—the Winter night,

We long once more to gather, The flowrets fresh and fair;...
A-round the fire we cluster, Nor heed the whistling storm;...

Sweet May! once more to wander, And breathe thy balm-y air.
When all without is dreary, Our hearts are bright and warm.

Let thy trembling wire, Wa-ken dear delight;
Ev'ry tumult ceases, Si-lence reigns pro-found;

Tho' the tones of sorrow, Min-gle with the strain,
Hush'd the thou-sand voices, Gone the noon-day glare;

Yet my heart can bor-row, Plea-sure from the pain.
Gen-tle spir-it voices, Stir the mid-night air.

THE BIRTH-DAY.

C. G. HERING.

1. What to grace thy natal day, Dear one, shall I bring thee,
   While this plain, un-studied lay With true heart I sing thee?

If I twine a Winter wreath Of the frosty span gle,
Noon-day, with its melting breath, Each bright gem would man gle.

2 Buds that opened in the Spring
   Summer suns have faded;
Flow'rs that dropped from Summer's wing
   Autumn's fruit o'ershaded.
Summer stems, and Autumn fruit,
   Winter snows drift over;
Not a bud or leaf peeps out
   From the frosty cover.

3 Since, then, nature naught contains
   For a wreath to give thee,
Take what yet unchanged remains,—
   What can never leave thee:
Love that heeds not Winter's snow
   More than Autumn's shading—
Love which shall forever glow,
   Spite of frost and fading.

THE GROVE.

1. 'Tis near the spot in which I dwell There stands a lovely grove,
   Encompassed by a charming dell, In which I love to rove,
To seek the gentle breezes' sigh, And hear the feathered
song-sters' cry, Cuck-oo, cuck-oo, cuck-oo, cuck-oo, To
seek the gentle breezes' sigh, And hear the feathered
song-sters' cry, Cuck-oo, cuck-oo, cuck-oo, cuck-oo, cuck-oo.

2 If days of sadness e'er assail,
I hie me to the wood,
Where streams of pleasure never fail,
Where all is bright and good:
'Tis here, when no one else is nigh,
I hear the cuckoo's cheerful cry,
Cuckoo, cuckoo, cuckoo, cuckoo,
'Tis here, etc.

3 When days of joy come o'er my head,
I seek this charming scene,
Alone along the valley tread,
And view the lively green;
And who so happy then as I,
In hearing oft the cheerful cry,
Cuckoo, cuckoo, cuckoo, cuckoo,
And who so happy, etc.

PART IV.—TEST—EXERCISES.

It is recommended that before taking up the following test-exercises the pupils go through the first twelve charts, of the New Second Series, and the first eighteen pages of the New Second Music Reader, according to directions on page 3.

These test-exercises are designed to be used as follows:—

First, the teacher writes the exercises upon the blackboard.

Second, calls for volunteers who think they can sing the exercise all alone. Perhaps twelve will indicate their willingness to do their best.

Third, the volunteers are numbered, 1, 2, 3, etc.

Fourth, each pupil is to sing the exercise through, as follows: Number One commences at a. When One has sung the first four measures, and commences at b, Number Two commences at a, when they will be singing together. When Number Two commences at b; Number Three begins at a; and so on.

If any fail to commence at the right time, or be thrown out of tune, this should be regarded as a break in the chain, and the defective link should be cast aside.

This being in the spirit of a game, it will excite a good deal of interest in the whole class, so that on a second and third trial others will volunteer, and those who failed will like to try again. In schools where twenty minutes' time each day is devoted to music, it would be well to give one lesson each week to this or some other exercise which would test the progress of the pupils individually.

The pupils should beat the time, and, after a clear explanation by the teacher as to how the exercises are to be performed (the key and rate of time being given), should be left entirely alone. It will be better for the teacher to be out of sight of the pupils, during the performance of these exercises, which should never be sung otherwise than as explained above.

1. a.

\[\text{The following exercises are by Dr. Lowell Mason.}\]
The following exercises, for testing the ability of the class as to their independence in reading music, are in some respects more simple than those in the form of rounds. Teachers can take their choice between the two. As these exercises are much longer than the rounds, they are to be sung from the books, the pupils beating the time, and proceeded with as follows:—

Take as many pupils as there are phrases in the exercise; have one at a time sing only one phrase, and continue in order, with the melody unbroken. If a pupil fail, let his or her place be taken by another (volunteer), and begin again with a new exercise,—that in which the failure occurred being regarded as unfit for further test work till another lesson.

APPENDIX—TIME-NAMES
The object of this System of Time-Names is to designate the position of each note in a measure of whatever kind of time.

It does not pretend to teach or develop time, but simply to name the notes in any given measure. It differs entirely from the Chévre System of Time-Names (which has been adopted in the Tonic-Sol-Fa method in a modified form); as, in this system, the measure is the unit, but in the Chévre System the unit is a "pulse" or beat.
APPENDIX.

TEACHING TIME WITH THE ADDITION OF THE TIME-NAMES.

CHAPTER I.

SECTION I. — *Double or Two-Part Measure.*

*First.* The pupils are to be taught double time in the ordinary manner, with the names of the beats (Down and Up), accenting the down beat.

*Second.* While beating time, the pupils, instead of saying Down-beat, are to say Tā (a as in father); and instead of saying Up-beat, they are to say Tā (a as in fate).

**Example 1**

\[
\begin{array}{cccccccc}
\frac{2}{4} & \text{Down} & \text{Up} & \text{D.} & \text{U.} & \text{D.} & \text{U.} & \text{D.} & \text{U.} \\
\text{Tā} & \text{Tā} & \text{Tā} & \text{Tā} & \text{Tā} & \text{Tā} & \text{Tā} & \text{Tā} & \text{Tā} \\
\end{array}
\]

Where a sound lasts two beats, the vowel is changed with the Up-beat; as in

**Example 2.**

\[
\begin{array}{cccc}
\frac{2}{4} & \text{Tā} & \text{Tā} & \text{Tā-ā} & \text{Tā} & \text{Tā} & \text{Tā-ā} \\

\]

**Example 3.**

At rests, the names are to be uttered in a soft, distinct whisper.

\[
\begin{array}{ccccccc}
\frac{2}{4} & \text{Tā} & \text{Tā} & \text{Tā} & \text{Tā} & \text{Tā} & \text{Tā} \\

\]

Commencing with the Up-beat.

**Example 4.**

\[

\frac{2}{4} & \text{Tā} & \text{Tā} & \text{Tā} & \text{Tā} & \text{Tā} & \text{Tā} \\
\end{array}
\]

SECTION II. — *Triple or Three-Part Measure.*

The beats in Triple Measure are Down, Left, and Up. The Down-beat is accented, and the Left- and Up-beats are unaccented. Some theorists say the Up-beat is slightly accented.

The Time-names are Tā, Tā, and Tē (ē as in mē.)
Example 5.

\[
\begin{array}{cccccccc}

\[
\begin{array}{cccccccc}

\end{array}
\]

SECTION III. — Quadruple or Four-Part Measure.

The beats in quadruple time are Down, Left, Right, and Up. Accented upon the Down and Right beats. The time-names are Tā, Tā, Tē, Tē (ē as in mēt).

Example 8.

\[
\begin{array}{cccccccc}
\text{Tā Tā Tē Tē Tā-a Tē-e Tā Tā Tē Tē Tā-a Tē-e}

SECTION V.

The other kinds of measures, such as \( \frac{6}{4} \), \( \frac{9}{8} \), and \( \frac{12}{8} \), are to be regarded as two, three or four three-part measures. They are sometimes called compound measures; and are to be reduced to the simple measures from which they are derived, and named as simple measures.

Four Three-Four Measures.

Example 13.

\[ \frac{3}{4} \]

Ta Ta Te Ta-a Te Ta Ta Te Ta-a Te

Two \( \frac{3}{4} \) measures put together produce one \( \frac{6}{4} \) measure, as in

Example 14.

\[ \frac{6}{4} \]

Ta Ta Te Ta-a Te Ta Ta Te Ta-a Te

There are three different ways of beating six-part measure: — First, Down, Left, Up, twice. Second, the first half with the Down-beat, and the second half with the Up-beat. Third, with six beats when the time moves slowly, viz. Down, Down, Left; Right, Up, Up.

The second way, that of two beats, is generally the most natural.

\text{Tà Tà Tè Tà Tà Tà-a Tè Tà Tà Tà Tà-a Tè} \\
\text{9} \\
\text{8}
\end{array}
\]

There are two ways of beating the time in \( \frac{9}{8} \) measure:—First, Down, Left, Up, three times. Second, with three beats, Down, Left, and Up. (Three eighth-notes to each beat.)

If the laws of accent be developed carefully, so the pupils understand them perfectly in Double and Triple time, they will spontaneously manifest themselves in all the varieties of compound time, and in all the subdivisions of measures: if they are treated practically, and not talked about too much.

---

**CHAPTER II.**

Two Sounds of Equal Length in Each Part of the Measure.

SECTION I.—Two-Part Time.

When there are two sounds of equal length in each part of the measure, in two-part time, the time-names are, Tà, fà, Tà, fà.

**Example 19.**

\[
\begin{array}{c}
\text{Tà fà Tà fà Tà fà Tà fà Tà fà Tà fà Tà Tà} \\
\text{2} \\
\text{4}
\end{array}
\]

**Example 20.**

Commencing after the Up-beat, or on fà

\[
\begin{array}{c}
\text{fà Tà fà Tà fà Tà fà Tà fà Tà fà Tà fà Tà Tà} \\
\text{2} \\
\text{4}
\end{array}
\]

Lead the pupils to observe that, in examples 19 and 20, Tà and Tà come with the beats, and that fà and fà come after the beats.

**The Dotted Quarter-Note.**

**Example 21.**

\[
\begin{array}{c}
\text{fà Tà fà Tà fà Tà-a fà Tà fà Tà fà Tà fà Tà Tà} \\
\text{2} \\
\text{4}
\end{array}
\]

Lead the pupils to see, in this example, that the dotted quarter-note is sounded during the two beats. That the eighth-note after the dotted quarter is sounded after the Up-beat.

SECTION II.—Triple Time.

Example 22.

\[ \begin{array}{c}

To commence promptly, the pupils must have the first two notes in mind, so as to begin with the Up-beat.

Example 23.

\[ \begin{array}{c}

CHAPTER IV.

SECTION I.—Triplets: Three Sounds of Equal Length in Each Part of the Measure.

Triplets are usually marked with a figure 3 over or under them, thus:—

\[ \frac{3}{4} \] or \[ \frac{4}{4} \]

When there are three sounds of equal length in each part of a measure, in Double Time, they are named, Tä, rü, li, Tä, rü, li.

Example 34.

\[ \frac{3}{4} \quad \text{Tä rü li Tä rü li Tä rü li Tä} \]
Triple Time.

Example 35.

\[\frac{3}{4} \quad \text{Tā rā lā Tā rā lā Tē rē lē Tā rā lā Tā rā lā Tē}\]

Quadraple Time.

Example 36.

\[\frac{4}{4} \quad \text{Tā rā lā Tā rā lā Tē rē lē Tē rē lē Tā Tā rā lā Tē rē lē Tē}\]

SECTION II.—Sextolets, or Subdivisions of Triplets.

The triplet is rarely subdivided. In this respect it differs from compound time. It is sometimes found subdivided in the more difficult forms of rhythm. Below are the Time-Names of one subdivision of triplets, in which there are six sounds of equal length to each beat.

Example 37.

\[\frac{2}{4} \quad \text{Tā fā rā fā lā fā Tā fā rā fā lā fā Tā rā lā Tā}\]

Farther subdivisions of triplets are exceptional, and quite outside of rhythmical feeling. This is as far as we deem it necessary to provide time-names in popular music.
"Music is a discipline, a mistress of order and good manners, she makes the people milder and gentler, more moral and more reasonable."

"The youth must always be accustomed to this art, for it makes good and virtuous citizens." — LUTHER.

THE NATIONAL MUSIC COURSE.

OLD SERIES.

I. THE AUTHORS.

Luther Whiting Mason, fifteen years Supervisor of Music in the Primary Schools of Boston, late Director of Music for the Empire of Japan;

Julius Eichberg, Director of Music in the Schools of Boston;

J. B. Sharland, Supervisor of Music in the Schools of Boston.

Of Mr. Mason, John D. Philbrick, LL.D., Superintendent of Public Schools in Boston, 1856–74, 1876–78, than whom no one was a more competent or better informed judge, said: —

“A teacher of large experience, an enthusiast in the work, a man of the rarest genius for teaching children, a student of pedagogy, with a spirit of self-sacrifice that constantly reminded me of the career of Pestalozzi, thoroughly acquainted with the best things that had been thought and said and done about teaching children vocal music.”

In 1879, the Government of Japan determined to revolutionize the national system of music, which at that time differed from European systems in even so fundamental a matter as the scale. That an American was selected was everywhere regarded as a national compliment. As a recommendation of Mr. Mason's talents and methods, it was second only to the fact of his success in so great an undertaking. The music now sung in all the schools of Japan is called "The Mason Song."
II. THE VERDICT.

I. THE TESTIMONY OF EXPERTS.

FIRST AWARDS.

"I do not hesitate to pronounce the [National] Course of Music the most rational, the best graded, the most pedagogical of all those with which I am acquainted." Albert Dupaigne, Agrégé des Sciences, Inspector of Schools in Paris.

"I remember, while at the Universal Exposition at Vienna, observing a gentleman busily at work copying the primary charts of Mr. Mason. On venturing to inquire his object, I learned that this gentleman was a member of the Royal Commission from Spain; that he was the Director of the Royal Conservatory of Music at Madrid; and that he intended to recommend to his government the adoption of the system for the national schools, as being the best he had ever seen."

"Some time ago our Educational Department, having established the Committee for Investigation of Music, invited Mr. Mason over, and intrusted him with the instruction of music. Since then he has fulfilled his trust with diligence and ability, so that, though the time is yet short since he began, the foundation is already laid, and we begin to feel that the dawn of our music is approaching. Is not his service to our country very great?"

Fukuoka, Minister of Education, Jap. n.

II. THE TESTIMONY OF NEW ENGLAND (the home of most of the competing systems).

1. The National Music Course is in exclusive (or nearly exclusive) use in 29 cities, with a population of 730,256. The only system authorized for the Public Schools of Boston.

2. The National Music Course is largely used in 6 other cities, with a population of 110,934.

3. Local Systems are used in 3 cities, with a population of 106,557.

4. All other systems can claim exclusive (or nearly exclusive) use in 6 cities, with a population of 115,323.

III. THE TESTIMONY OF THE COUNTRY AT LARGE.

1. The National Music Course is in exclusive (or nearly exclusive) use in 121 cities, besides County and State adoptions, the latest of which (April, 1885) is Louisiana.

2. The National Music Course is largely used in 18 other cities.

3. Local Systems are used in 15 cities.

4. All other systems can claim exclusive (or nearly exclusive) use in 69 cities.
